

Automated camera switching for extra-large spaces

Create engaging audio and video conferencing experiences in spaces up to 35' x 55' (10.7 x 16.8 m). Thanks to sound location data from Nureva, automated switching becomes simple and effective with any USB or HDMI camera combination. You also get remarkable microphone pickup in every inch of a space, no matter where people are sitting, facing or moving.

Solution components

Nureva® HDL410 audio conferencing system

- Two microphone and speaker bars providing full-room pickup with 16,384 virtual mics
- Next-gen Microphone Mist™ technology producing sound location data for simplified automated camera switching
