Latest Tech News

Arc Raises \$161M to Launch Full-Service Finance Platform for SaaS, Built in Partnership with Stripe	In partnership with Stripe, Arc is building a first-of-its-kind fintech solution where software founders can borrow, save, and spend on one comprehensive digital platform. Its introductory product, Arc Advance, allows SaaS founders to seamlessly convert future revenue into upfront capital without dilution at the click of a button.
Box Announces New Capabilities and Integrations for Box Sign to Digitize Agreements in the Content Cloud	These new capabilities include workflow features that automate processes once a document has been executed and APIs that power e-signatures in third-party and custom applications. Box also announced new and deepened integrations with UiPath and SIGNiX.
StratoKey releases Cloud Compliance Manager (CCM)	CCM is designed to provide organizations with Automation, Management, and Reporting for their compliance programs. CCM automates much of the work involved in Compliance Reporting, directly against the relevant regulation. CCM delivers a complete end-to-end compliance solution, that can be adapted (through a visual report/template builder) and customized to any regulation or security policy.
Inspectorio Announces New Tracking Platform to Prevent Supply Chain Delays and Improve On-Time Delivery Performance	The platform provides objective and reliable data to all supply chain partners. A major differentiator is the option to access detailed activity logs and exception management reporting for each purchase order to identify areas of risk or delays timely
SeekOut raises \$115M in Series C funding to help companies hire and retain hard-to-find talent; now valued at \$1.2 billion	SeekOut is also the leading data-rich AI talent search engine that provides companies with untapped talent pools, diversity strategy and sourcing, data-driven recruiting solutions, and more.
Nextworld Acquires Cloud Inventory, an Industry Leader in Mobile-First Inventory Solutions	The transaction accelerates Nextworld's strategy to redefine ERP by combining Nextworld's core ERP solutions and no-code platform with Cloud Inventory's uniquely-focused solutions including Warehouse Inventory, Manufacturing Materials, and Field Inventory.
Lucidworks Solves The Next Generation Of Search With New SaaS Platform, Springboard, And Launches The First Publicly Available Application	This application makes site search easy for customers who want highly relevant, cost-effective, on-site search at scale with no operational burden. Lucidworks built Springboard to answer the market need for a cloud-native search platform that is scalable, easy for any business user to set-up and manage, and outcomes-driven.

Analysis, Reports, Trends

ComputerWorld - In IT, Boomers are out, raises are rising — and change is coming	Another trend Gartner has tracked involves CIOs and other high-level IT leaders moving out of data center-specific roles and into larger business-centric job titles as the result of digital transformation (DX) initiatives.
yahoo!Finance - Global Artificial Intelligence (AI) in Call Centers Market to Reach US\$3.5 Billion by the Year 2026	Developed markets of North America and Europe are the leading regional markets. The dominant share of the US is mainly attributed to the widespread adoption of AI technology in several end-use industries including media, e-commerce and manufacturing.
World Economic Forum - Can China and Europe find common ground on AI ethics?	A shared realisation about their societal implications has raised awareness about the necessity to develop an international framework for the governance of AI, more than 160 documents aim to contribute by proposing ethical principles and guidelines.
TMCNET - Artificial Intelligence Platforms Market to grow by USD 17.29 bn Evolving Opportunities with Alphabet Inc., Amazon.com Inc. & Microsoft Corp. 17000+ Technavio Reports	The key factor driving growth in the artificial intelligence platforms market is the rise in demand for AI-based solutions. With the increasing application of robotics in repetitive and risky tasks, end-users are increasingly seeking avenues to eliminate the drawbacks of industrial automation and robotic technologies.
VentureBeat - A deep dive into the visual collaboration market	The market includes a mixture of cloud and web-based collaboration tools, from online collaboration whiteboard tools like Miro, Mural, and Stormboard to visual management systems like iObeya.
The Verge - Why you might want a secure file-sharing service now that you're working from home	Instead, you should consider an enterprise-grade cloud-based file-sharing service, one that adds more layers of protection by encrypting your data, and that has fine-tuned access control. Egnyte, SecureDocs, ShareFile, and SugarSync are just a few of the more popular services
eWeek - 5 Steps to Leveraging Machine Learning: The Shopify Use Case	The company has been at the forefront of ML adoption for anomaly detection and forecasting. That's particularly impressive when considering that up to 85% of machine learning projects ultimately fail to deliver on initial promises and goals.
Digital Insurance - How AI, data analytics could help identify insurance fraud	AI does this by providing a fully transparent view of the customer, their claim and their network. This view then lets decision-makers automate, build and understand the timeline of events leading to a claim
