Latest Tech News

DaysToHappy AI-Powered Virtual Assistant 'Ava' Changes Employee Behavior Guaranteed	This personable, accessible, and scalable virtual assistant requires no app, no login, no email and no system integration.
Cisco Expands Catalyst Switch Line to Industrial Edge	The switch also offers backplane stacking and centralized management, which enables customers to "stack up to eight switches and manage them as one," he wrote.
Diversio focuses on AI-enabled diversity, equity, inclusion framework, gets $6.5M	Diversio claims it combines AI, advanced data analytics, and knowledgeable subject matter expertise to accurately diagnose an organization's DEI pain points, benchmark against peers, and create robust action plans to improve diversity, equity, and inclusion.
Chisel targets product managers with new platform, raises $1.5M	Its Team Radar feature is designed to gather internal team feedback from sales leaders, UX leaders, engineering leaders, and marketing leaders, with survey templates so that employees can help drive the creation of new products.
Medallia To Acquire Thunderhead, Leader In Every-Channel Journey Orchestration	"We pioneered the idea of The Customer Operating System™, with our closed-loop customer engagement platform powered by continuous listening, feedback, and learning, all actioned through our unique fusion of journey orchestration and real-time interaction management (RTIM),"
IoT connectivity startup EMnify raises $57M in new funding	EMnify has created what it calls a "cellular supernetwork" that connects millions of IoT devices around the world, including electric vehicles, energy meters, alarm systems, GPS trackers and thermometers. The company provides businesses with secure, reliable and borderless cellular IoT connectivity in any location, enabling them to connect easily and scale up to thousands of devices globally.
Logitech Sync New Features Help IT Manage Personal Collaboration Devices	Logitech announced the release of an update to its Sync device management platform. The platform supports personal collaboration devices and streamlines IT management of conference rooms and workstations from a single cloud-based interface.

Analysis, Reports, Trends

VentureBeat - How emerging tech will influence freedom, industry, and money in the metaverse	It is not just gaming and entertainment that stands to transform and expand with the onset of the metaverse. Synchrony, a fully functioning economy, and the interoperability of digital assets, information, and consumers means industries like supply chain management, property sales, and even office workflows stand to benefit from developments related to the metaverse
ZDNet - The never-ending effort to bake common business sense into artificial intelligence	Scarano poo-poos the notion that AI systems comprise anything close to a "digital workforce," noting that "it's just a way to sell more stuff. I can sell 50 digital workers rather than one system. But digital workforce is just a bunch of code that does a specific task, and that task can be repeatable, or be customized."
VentureBeat - 3 'dark' trends likely to power smart technology and communities by 2030	In 2030, p2p-based distributed apps could transform public transportation, access to fresh food, healthcare, energy, elder-care, journalism, policing, and beyond. Wise leaders will recognize the value of smart communities and build into the trend
Digital Journal - Email Marketing Platforms Market May See a Big Move | Major Giants MailChimp, VerticalResponse, Emma, Constant Contact	The market report primarily will help you to realize and find out the most forbidding and upsetting driving powers of Email Marketing Platforms in marketplace with anticipating the consequences on the worldwide industry
Computerworld - Talent war to push CIOs toward consultancies, managed services in '22	"In order to maximize productivity of their existing IT staff, CIOs will be outsourcing more to free up time, training existing staff in the desired skills and hiring consultants to fulfill critical skilled roles. This will last at least through 2022."
TMCNET - Digital Twin Market Size is Projected To Reach USD 5545.2 Million By 2028 At A Cagr of 15.9%- Valuates Reports	The digital twin market is likely to grow as the focus on Industry 4.0 grows. Digital Twin enables a more virtual system-based design process, allowing any equipment or system to play a much more active part.
Forbes - Six Steps To Execute Responsible AI In The Enterprise	The EU AI Act is expected to be implemented by 2023, and it will change how businesses develop and utilize AI. Any business that offers an AI application to EU citizens or organizations will need to ensure its applications are aligned with EU Charter of Rights and other various laws, including ones in relation to discrimination and privacy.
