

## Latest Tech News

<a href="#">Sales Impact Academy announces \$22M in new funding for its go-to-market learning platform</a>	“Our learning community has gone from 3,000 people to almost 15,000 professionals. That makes us, comfortably, the largest go-to-market learning community in the world.”
<a href="#">Seattle startup Heard raises \$10M to ease administrative load for mental health providers</a>	The startup is part of an ecosystem of mental health care startups in the Pacific Northwest that includes Eugene, Ore.-based Ksana Health, which is developing a “Fitbit for mental health” and Seattle-based We-Connect, which provides an app and peer support to people recovering from addiction.
<a href="#">AI-assisted 3D animation startup Kinetix raises \$11M in Seed funding to drive user-generated content in the metaverse</a>	Kinetix is a free AI-powered platform that makes 3D creation accessible to millions of creators around the world. With Kinetix, everyone can now easily produce films, concerts, group dances, and video games for virtual worlds.
<a href="#">Google Cloud is forming a dedicated Web3 team</a>	Additionally, Google Cloud’s Web3 team may build a solution for running blockchain nodes, systems that are deployed as part of blockchains and play an important role in processing transactions.
<a href="#">LottieFiles raises \$37M Series B to bring lightweight and scalable animations to apps and websites</a>	Unlike GIF or PNG graphics which are smaller in size, Lottie animations are scalable and interactive. They were first introduced six years ago as an open-source library by Airbnb engineers. Lottie also allows native apps to use animations as easily as they use static assets.
<a href="#">Citrix and Google Cloud Simplify Shift to Flexible Work</a>	Google Cloud Marketplace makes it easy for companies to quickly purchase and deploy market-leading digital workspace solutions designed to enable secure remote work, including Citrix DaaS solutions purpose-built for Google Cloud:
<a href="#">Cisco adds predictive networking SaaS options to improve uptime and security</a>	Cisco’s predictive networks work by gathering data from myriad telemetry sources. Once integrated, the AI engine learns the patterns using a variety of models and begins to predict user experience issues, providing problem-solving options.
<a href="#">Fictiv raises \$100M to deliver ‘hardware at the speed of software’</a>	Companies can sign up to get parts delivered for new product development, have parts engineered to order for custom products and as part of maintenance and repair operations.
<a href="#">Searchable.ai Launches Collections for Seamless Knowledge Sharing</a>	Collections enable users to assemble all types of information regardless of which app it’s currently living in—Google docs, email attachments, Jira tickets, Asana tasks, Github issues, Confluence pages, local drive files, and more—in one place so team members can efficiently find what they need to start working.
<a href="#">Sentry triples its valuation to over \$3 billion after raising \$90M in Series E funding to grow its application monitoring platform</a>	With the proliferation of applications, languages, and frameworks, Sentry empowers any developer or development team to solve issues in production code by using one tool to monitor for errors, performance, and health across mobile, desktop, and IoT, and across any industry or vertical.

## Analysis, Reports, Trends

<a href="#">VentureBeat - The future of on-prem and the cloud</a>	If you’re planning on using a hybrid infrastructure for an extended period of time, my advice is this: don’t. While it’s impossible to avoid a hybrid setup during a transition period, most organizations are best served by committing to cloud IaaS completely (or as much as possible) and following a plan that can get you there incrementally over the course of two to three years.
<a href="#">ComputerWorld - Enterprise mobility 2022: UEM adds user experience, AI, automation</a>	Essentially combining enterprise mobility management (EMM) tools with PC management tools, UEM platforms help companies manage and protect a range of devices including smartphones, tablets, laptops, and desktop computers across multiple operating systems — all from a unified interface
<a href="#">eWeek - Cloud Customer Beware: 3 Challenges with Cloud Migrations</a>	For all of cloud computing’s potential, business leaders need to keep their feet firmly on the ground and recognize the sheer complexity of cloud migration. Research indicates that one in three cloud migrations fail and only 25% of businesses meet their migration deadlines.
<a href="#">ComputerWorld - 6 virtual collaboration solutions for remote teams</a>	Every survey suggests workers are more willing to find a new job than return to the bad old days of presence-based micro-management. Arguments that returning to the workplace boost collaboration may have some weight, but much of this relies on old-fashioned email and virtual meetings held from the office, rather than the home.
<a href="#">ZDNet - How cloud is redirecting technology career paths</a>	IT tasks are elevating, as “many tedious and time-consuming manual tasks like data entry, system and application monitoring and some app development efforts will be taken over by technology solutions,
<a href="#">ZDNet - The 9 best cloud storage services: Cost, free storage, and features compared</a>	Unlike many other cloud backup services, iDrive doesn't lock you down to a single computer. You can use one account to backup your Windows and macOS desktops, your Android smartphone and iPhones and tablets, and your network drives. There's also a Linux backup option, but it's meant for Linux servers.
