# Data and Analytics Excerpts

April 10, 2022

## Webinars/Events

| | |
|---|---|
| 4/12/2022 1:00 pm EST | Qlik - Fueling Enterprise Growth Through Data Literacy |
| 4/14/2022 12:00 pm EST | Cloud Data Driven - How to Save Money on Your SQL Server Hardware |
| 4/19/2022 - 4/21/2022 | ODSC - Open Data Science Conference |
| 4/27/2022 - 4/29/2022 | AIIM Conference |

## Latest Tech News

| | |
|---|---|
| Equinix and Dell expand partnership for hyperconverged data center offerings | "Equinix colocation provides the hybrid cloud mooring that enables IT clients to transform their data centers and IT operating models into a cloud-based, as-a-services platform." |
| BigID Launches Data Insights Studio | We strongly believe that providing easy and customizable reporting of how metadata changes over time and across multiple sites, as well as an ability to analyze trends and monitor critical KPIs, is the key to facilitating and accelerating better data management and value on data across the organization. |
| NetApp buys open-source database-as-a-service player Instaclustr | Instaclustr delivers fully managed versions of the most popular open-source databases to enterprises that don't want to manage the software themselves. Its "open-source-as-a-service" platform provides hosting and support for a range of freely available software, including projects such as Apache Cassandra, Apache Kafka, Apache Spark, Apache Lucene and ScyllaDB. |
| CTERA: Not storage, but a cloud data services biz | CTERA says an edge filer can be deployed in 90 seconds using the SDK. Discovery and migration supports customer file and object discovery across their IT estate. It can then migrate files to the cloud, using network transmission for SMB customers and Amazon Snowball for larger projects. |
| IT observability startup Grafana Labs raises $240M more | Servers, databases and many other components of a company's IT infrastructure automatically generate data that describes their day-to-day operations. This data contains valuable technical insights that Grafana can analyze to help administrators detect technical issues, as well as find ways to fix them. |
| Atlassian expands product portfolio with new coding and data analytics tools | Compass displays all the modules that make up a workload in a centralized list. Developers can click the entry for a module to bring up its source code, as well as access documentation that explains how the code works. |
| Model9 sells counter to mainframe data gravity for analytics and AI | Model9, the mainframe to cloud object storage data mover, has reorganized its product set, adding cyber-protection and a facility to feed cloud-based AI, machine learning and data warehouses with mainframe data. |
| Databricks Announces General Availability of Delta Live Tables | Delta Live Tables is the first and only ETL framework to solve this problem by combining both modern engineering practices and automatic management of infrastructure, whereas past efforts in the market have only tackled one aspect or the other. . |

## Analysis, Reports, Trends

| | |
|---|---|
| VentureBeat - Data fabric versus data mesh: What's the difference? | But underlining the challenges in analytics, more than 37% of respondents said that they weren't confident in their ability to access "timely, relevant data for decision-making," whether because of disparate storage sources or problems with developing data pipelines. |
| eWeek - Cognos vs. Tableau: 2022 Software Comparison | IBM boasts a massive sales and services team, and global reach into large enterprise markets. Cognos, then, is likely to do well against Tableau within the existing IBM customer base. And right now, it appears to lead slightly in the cloud. But Tableau is ahead on overall features and is graded higher by Gartner. |
| VentureBeat - Report: Global IT spending expected to hit $4.4T | In fact, CIOs are accelerating IT investments in categories such as security, customer experience, analytics and cloud as they recognize the importance of remaining flexible and agile in responding to such factors. |
| eWeek - The Dangers of Obsolete and Redundant Data | Businesses believe that retaining all their data will help mitigate potential risks, but the opposite is true. The more unaccounted-for data a company has, the higher the risk of falling victim to a cyberattack. When you are in the dark about your data, you don't know what has gone missing. |
| Datanami - Study Finds Businesses Can Realize 315 Percent ROI with KX Insights Data Analytics Platform | According to the study, a composite organization (see methodology) implementing KX could experience benefits of $5.72M over three years versus costs of $1.38M, adding up to a net present value (NPV) of $4.34M and a 315% Return on Investment. |
