

# Data and Analytics Excerpts

April 17, 2022

## Webinars/Events

4/19/2022 - 4/21/2022	<a href="#">ODSC - Open Data Science Conference</a>
4/27/2022 - 4/29/2022	<a href="#">AIIM Conference</a>

## Latest Tech News

<a href="#">DOE Announces \$26M for Research on Next-Generation Data Management and Scientific Data Visualization</a>	Foundational research in data management will address challenges stemming from the increasingly massive data sets produced by scientific experiments and supercomputers. Innovative and intuitive data visualization approaches will support scientific discovery, decision-making, and communication based on that data.
<a href="#">Inventor of Salt automation project comes up with a new way to tame cloud complexity</a>	His newly launched Idem Project scans current cloud deployments and generates data that can be used to trigger remediation events with little human intervention.
<a href="#">Cisco SD-WAN software gains broader application access, enhanced analytics</a>	Specifically, the company upgraded the SD-WAN Cloud OnRamp for SaaS service, which links branch offices or individual remote users to cloud applications such as Cisco's Webex, Microsoft 365, AWS, Google, Oracle, Salesforce and more.
<a href="#">Google Cloud's BigQuery gains an Automatic Data Loss Prevention feature</a>	Google Cloud said today it's enabling Automatic Data Loss Prevention in Google BigQuery to help users find, classify and protect sensitive information that may have inadvertently been scattered around their cloud deployments.
<a href="#">Backblaze puts out cloud storage migration service</a>	Cloud storage provider Backblaze has set up a Universal Data Migration service where it will cover data transfer and egress charges from other suppliers – with the caveat that you have to commit to move at least 10TB of data to its B2 Cloud Storage service and keep it there.
<a href="#">Owler Launches Owler Max, the Ultimate Sales Companion Tool to Empower Sales Professionals</a>	Owler Max is a fresh sales enablement offering providing actionable insights on target accounts, allowing sales professionals to work faster and smarter. The platform slashes sales research time, providing sales teams with up-to-date data, insights, and business news all in one place – on Owler's Max platform.
<a href="#">Arcion Cloud Delivers Zero-code Enterprise Data Replication in Real Time</a>	Arcion, the only cloud-native, CDC-based data replication platform, today announced the launch of Arcion Cloud, the first fully managed data replication as a service that enables enterprises to deploy high-performance, high-volume data pipelines in minutes instead of month
<a href="#">Meta will no longer allow the sharing of 'publicly available' private home addresses</a>	The Board issued a response in February, calling on Meta to tighten its policies surrounding the sharing of private home addresses over concerns about doxxing.
<a href="#">BigID Launches Data Insights Studio</a>	We strongly believe that providing easy and customizable reporting of how metadata changes over time and across multiple sites, as well as an ability to analyze trends and monitor critical KPIs, is the key to facilitating and accelerating better data management and value on data across the organization.

## Analysis, Reports, Trends

<a href="#">AiThORITY - New Research Finds Data Automation Adoption to Climb From 3.5% to 88.5% Over the Next 12 Months</a>	Nearly all data teams (93%) anticipate the number of data pipelines in their organization to increase between now and the end of the year—with 57% projecting an increase of 50% or greater. Amid the rising number of data pipelines across their organization, nearly three in four respondents (72%) indicated that the need for data products is growing faster than their team size.
<a href="#">FedScoop - National AI Research Resource must balance the value of its data with privacy</a>	"Yes, the task force is certainly discussing how privacy-enabling technologies could help enhance the privacy aspects of NAIRR usage," Parashar told FedScoop. "However, the task force has also discussed how privacy requires more than just technical solutions, and we expect a full range of considerations when contemplating privacy, civil rights and civil liberties."
<a href="#">SiliconANGLE - As data drives reinvention, AWS leverages machine learning and serverless to meet enterprise needs</a>	The goal here is to take away the need to manage infrastructure for customers so they can focus on driving differentiated business value."
<a href="#">VentureBeat - Bad data: A \$3T-per-year problem with a solution</a>	A few years ago, IBM reported that businesses lost \$3 trillion dollars per year due to bad data. Today, Gartner estimates \$12.9 million to be the yearly cost of poor-quality data.
<a href="#">Datanami - Ascend.io Survey Finds Data Automation to Surge Over Next 12 Months</a>	Findings from more than 500 U.S.-based data scientists, data engineers, data analysts, enterprise architects, and—new this year—chief data officers (CDOs) reveal that despite 81% of respondents indicating that their team's overall productivity has improved in the last 12 months, 95% of teams are still at or over capacity—just a 1% decrease from the 2021 study.
