

Data and Analytics Excerpts

July 17, 2021

Webinars/Events

| | |
|------------------------|---|
| 7/20/2021 11:00 am EST | OneTrust - Governing Your Data: The Second Step Towards Data Intelligence |
| 7/20/2021 10:00 am EST | IBM - Boost your storage with security and flexibility |
| 8/3/2021 2:00 pm EST | Disaster proofing your Azure AD and Microsoft 365 data |

Latest Tech News

| | |
|--|--|
| GoodData, Vertica Partner to Accelerate Cloud-Native Self-Service Analytics Adoption | The GoodData and Vertica offering simplifies this process and provides a way to deploy cloud-native, self-service analytics with GoodData on top of the Vertica data warehouse within minutes. |
| Edge Delta Announces Live, Interactive, Open Environment for Free, Unlimited Exploration | This innovative concept is a response to frustration from DevOps, SRE, and Security teams with the inflexible and tedious trial process imposed on them by most analytics vendors. They have to endure lengthy and expensive proof-of-concepts involving their production data in order to evaluate and understand the value of those systems. |
| Cockroach Labs Releases CockroachDB on Kubernetes | With the addition of the Operator, key functionality for deployment, management, and maintenance of the database is now automated. This release makes it easy and effective for teams at any skill level to run a relational database on Kubernetes. |
| Syniti Launches Data Jumpstart to Drive Business Value from Data | Syniti Data Jumpstart is a packaged, cloud-based software solution that provides turnkey improvement recommendations, enhanced by tailored, business-specific insights to help create rapid, substantial bottom-line returns by improving data quality. |
| Amazon launches HealthLake in general availability | HealthLake leverages machine learning to extract medical information from unstructured data and organize, index, and store that information in chronological order. |
| Hazelcast Unveils Real-Time Intelligent Applications Platform | The Hazelcast Platform combines the capabilities of a real-time stream processing engine with in-memory computing to deliver a simplified architecture that is highly performant, scalable and reliable. |
| Actian boosts SQL query speed for edge computing with database update | Based on a Btrieve transactional database architecture that employs the indexed sequential access method (ISAM) to store and retrieve data, the Zen V15 embedded database can be encapsulated in a set of Docker containers to make it easier to deploy. |
| Monte Carlo Launches Incident IQ to Help Organizations Achieve End-to-End Data Trust | To help companies eliminate data downtime, Monte Carlo built Incident IQ, an end-to-end solution that conducts root cause analysis for data issues at each stage of the pipeline, from ingestion in the data warehouse or lake to analytics in your business intelligence dashboards |
| Hazelcast adds storage drive support and boosted SQL | Hazelcast's software , clustered across server nodes, is not a database, data warehouse or datalake. It is not a SingleStore equivalent. |

Analysis, Reports, Trends

| | |
|--|---|
| Datanami - 93% of IT Decision Makers Agree Embracing Data Storytelling is the Secret to Boosting Revenue | Sixty-one percent of respondents cited lack of context as the biggest problem with dashboards, and more than half (53%) agreed that dashboards are often disregarded because of the time it takes to interpret them. |
| VentureBeat - Precisely: 82% of data executives cite data quality as a barrier | Data teams spend too much time on average (40%) cleaning and prepping data for analysis, with some reporting as high as 80%, and almost 9 in 10 CDOs said they are challenged by a lack of |
| Datanami - New Research Finds Businesses Must Rethink Path to Trusted Data as Foundation for Growth | An overwhelming majority of C-level data executives (82 percent) say data quality concerns represent a barrier to data integration projects — the precursor to digital transformation initia- |
| Datanami - Data Pros Are Maxed Out: Survey | "The majority (79%) of respondents indicated that their infrastructure and systems are able to scale to meet their increased data volume processing needs, which further highlights that the new problem with scale is focused on team capacity and less on technology capacity." |
| Datanami - New Ascend.io Research Finds 96% of Data Professionals Are at or Over Capacity | The vast majority (93%) of respondents anticipate the number of data pipelines in their organization to increase between now and the end of the year – with 56% projecting the number of data pipelines to increase by more than 50%. |

Data Science Infinity

My talk with Kate Strachnyi from Datedated about the skills needed for Data Science in 2021.

We're talking Python, SQL, Mathematics, Statistics, Machine Learning & more..

.For all the details on DATA SCIENCE INFINITY including the full curriculum, preview tutorials, feedback from students and more about me - visit: <https://www.data-science-infinity.com/>
