

# Data and Analytics Excerpts

October 3, 2021

## Webinars/Events

10/4/2021 - 10/5/2021	<a href="#">Snowflake - Build2021 The Data Cloud Dev Summit</a>
10/19/2021 1:00 pm EST	<a href="#">Forrester &amp; Domo - Level Up your Analytics Strategy with Augmented BI</a>
10/20/2021 12:00 pm EST	<a href="#">ITProToday - Defend the Realm: Secure your Business with Immutable Data</a>
11/9/2021 - 11/10/2021	<a href="#">Creatio - ACCELERATE, No-Code Revolution</a>

## Latest Tech News

<a href="#">New Open Source Data Science Platform Orchest Announces \$3.5M Seed Funding</a>	Orchest, a cloud native IDE tailored to the new reality of running data science projects in a cloud environment, allows teams to build pipelines iteratively by editing and connecting notebooks and scripts. It abstracts away infrastructure concerns to let the data science team focus on data & algorithms.
<a href="#">BMC Acquires StreamWeaver to Enhance AIOps Capabilities</a>	Together, BMC and StreamWeaver will allow customers to apply BMC's advanced AI/ML analytics capabilities to rich data from the various tools and technologies that may exist in their IT environments, seamlessly integrated into the BMC Helix platform.
<a href="#">Data Skrive, which sells content automation tech to news outlets and sportsbooks, raises \$7M</a>	Data Skrive's machine learning-powered engine helps create unique content based on topics of interest and particular goals of a client. It is also formatted for specific distribution channels.
<a href="#">CodeSee helps developers visualize and understand complex codebases</a>	Founded out of San Francisco in 2019, CodeSee enables developers to integrate their <a href="#">GitHub</a> repositories and automatically generate "maps" to visualize an entire codebase, better understand how everything fits together, and see how a proposed change will impact the wider codebase.
<a href="#">Engineering talent outsourcing firm Andela lands \$200M</a>	The company, Africa's second non-fintech unicorn, follows a rigorous screening process to onboard engineers and software developers onto its platform and then uses a data-driven matching process to connect the right talent with the right opportunity faster.
<a href="#">WD launches long-life caching NVMe SSD for NAS disk drive boxes</a>	"The WD Red SN700 NVMe SSD helps to further enhance the QNAP product portfolio's storage capabilities by boosting the NAS system's read/write speeds without adding to the overall number of disks in the array."
<a href="#">Rockset Enhances Real-Time Analytics Database With Enterprise-Grade Security And Compliance</a>	To help further improve customer compliance efforts, Rockset also introduced Audit Logs, which will allow customers to request a detailed report for all activities within their Rockset environment including queries and API calls, account logins, and more.

## Analysis, Reports, Trends

<a href="#">VentureBeat - Ignoring data comes at a price, report finds</a>	The report highlights that 97% of data leaders say their companies have suffered the consequences of ignoring data, either missing out on new revenue opportunities, poorly forecasting performance, or making bad investments.
<a href="#">VentureBeat - Enterprise mobile adoption is up, but it isn't without issues</a>	While more than 61% of U.S. enterprises invested in mobile technology or mobile security in the last year, 73% experienced integration issues. Specifically, they admit their technology needs to have improved data analytics, troubleshooting, and issue resolution, among other challenges.
<a href="#">Medgadget - Global Healthcare Cloud Computing Market Size To Reach USD 68.4 billion by 2026</a>	One of the significant factors hampering the growth rate of the global healthcare cloud computing market is data security and protection concerns. A big issue with cloud agreements is that the information provided by merchants isn't nearly as safe as information kept on-premise
<a href="#">Forbes - The 5 Biggest Technology Trends In 2022</a>	AI has permeated the tools we use to carry out everyday work – from the ubiquitous voice assistants to language translation and tools that allow us to extract structured data from pictures, whiteboard scribbles, and hand-written notes
<a href="#">VentureBeat - Predictive transactions are the next big tech revolution</a>	Companies that are being built today need to follow ByteDance's example and invest and build the key technologies that will move us towards the Predictive Transaction Processing model.

Here is the Youtube playlist of DBP webinars delivered by Data science experts and senior industry leaders.

<https://www.youtube.com/channel/UCOjFe5uXXe9kBWt2zAleIRA/playlists>

- 1) Data can be a window to the Software- Chris Lambert
- 2) Data Engineering- The bedrock of Modern Data Platforms- Milind Chitgupakar
- 3) Data Products- The Scalable and Reliable approach to Data Monetization- Prashanth H Southeikal, PhD, MBA, and Mihalis Papakonstantinou
- 4) Building High-Performance Analytics Teams- Mark Stern
- 5) How to Select Useful Software Metrics- Linda Westfall
- 6) Semantic Transformation using Acyclic Graphs- Tim Reimer MScIS, MBA
- 7) Foundations of Data Teams- Jesse Anderson
