## Webinars/Events

| | |
|---|---|
| 10/7/2021 | Didomi - Yes We Trust Summit |
| 10/12/2021 - 10/15/2021 | TrustWeek - OneTrust User Week |
| 10/13/2021 | Blackberry Security Summit 2021 |
| 10/13/2021 11:00 am EST | Veriato - Implementing An Insider Threat Mitigation Framework - Critical Elements For Detecting & Mitigating Insider Threats |
| 10/26/2021 - 10/27/2021 | Cybersecurity Symposium for Smart Cities 2021 |
| 10/27/2021 | Enterprise IT - Getting SASE |

## Latest Tech News

| | |
|---|---|
| Cisco Pushes Trust Standard Across Its Supply Chain | "We're hopeful that it will help shape the industry's thinking about what does it mean to be a trusted provider," Cisco's Chief Privacy Officer Harvey Jang said. "What's challenging is there's no consistent standard." |
| White House plans 30-country meeting on cyber crime and ransomware -official | The Biden administration hopes that their new informal group, which they're calling the Counter-Ransomware Initiative, will bolster their diplomatic push that has included direct talks with Russia as well as the NATO alliance and Group of Seven (G7) wealthy nations. |
| 4.6M Neiman Marcus customers affected by data breach | The data stolen included 3.1 million payment and virtual gift cards, although Neiman Marcus notes that more than 85% were either expired or invalid. |
| Password-stealing Android malware uses sneaky security warning to trick you into downloading | The text message scam delivers FluBot, a form of Android malware which steals passwords, bank details and other sensitive information from infected smartphones. |
| Alkira and Check Point Software Technologies Collaborate to Bring Enterprise-Class Security to Cloud Workloads | The Check Point CloudGuard platform provides cloud native security with advanced threat prevention for all assets and workloads enabling customers to deploy the same robust security in the cloud that they are used to with on-premises systems |
| Apple Pay with Visa Hacked to Make Payments via Unlocked iPhones | The team explained that fraudulent tap-and-go payments at card readers can be made using any iPhone that has a Visa card set up in "Express Transit" mode |
| Elastic Stack vulnerability can lead to data theft and denial-of-service attacks | To exfiltrate sensitive user and system data, attackers can abuse the lack of authorization between front-end and back-end services to obtain a working user account with basic permission levels. |
| Clumio brings its backup-as-a-service technology to Amazon S3 storage | Clumio Protect for Amazon S3 creates so-called immutable backups of the data that organizations keep in S3. Immutable backups can't be deleted or modified even by administrators. |

## Analysis, Reports, Trends

| | |
|---|---|
| VentureBeat - Facing the new cybersecurity challenges of hybrid work (VB) | But there's also an enormous risk: No matter the size of your business, these work environments are creating brand new cybersecurity challenges because of a rapidly changing threat surface, cyber security that hasn't kept up, and a distracted workforce. |
| Network World - Gartner: SD-WAN, SASE biggest drivers of WAN edge infrastructure | As the world shifts from working from home to working from anywhere, companies have begun to shift away from the VPN as the main tool for keeping remote workers secure, and towards more-fully featured SD-WAN technologies, with the idea of eventually implementing zero-trust network access for maximal security, Gartner's report noted. |
| AiThority - CSC Finds Majority of World's Largest Companies Susceptible to Phishing and Brand Abuse Due to Improper Domain Security | "Basic domain security measures continue to get overlooked because they're still not considered an essential component to a company's broader phishing, business email compromise, or ransomware mitigation approach" |
| VentureBeat - Enterprise mobile adoption is up, but it isn't without issues | While more than 61% of U.S. enterprises invested in mobile technology or mobile security in the last year, 73% experienced integration issues. Specifically, they admit their technology needs to have improved data analytics, troubleshooting, and issue resolution, among other challenges. |
| Medgadget - Global Healthcare Cloud Computing Market Size To Reach USD 68.4 billion by 2026 | One of the significant factors hampering the growth rate of the global healthcare cloud computing market is data security and protection concerns. A big issue with cloud agreements is that the information provided by merchants isn't nearly as safe as information kept on-premise. |
| Forbes - The 8 Latest Malicious Email Threats And Trends That Can Create A Business Crisis | The company said the report was the first-of-its-kind to identify trends among malicious email threats and attacks, the most impersonated brands, and the most popular times for hacking attempts. |

### IBM - Take the cyber resiliency assessment

During 2021, a cyber attack is expected to occur every 11 seconds. Organizations affected by cyber attacks run the risk of having their normal business operations disrupted, as well as losing valuable data, customers and reputation within their industry. Is your organization prepared to face this threat?

Funded by IBM (no cost to the customer)
• Two-hour virtual assessment workshop
• Only 2 weeks to receive the following deliverables from IBM:
- Detailed assessment report
- Management presentation
- Roadmap of recommended improvements and considerations
