|	
10/12/2021 - 10/15/2021	TrustWeek - OneTrust User Week
10/13/2021	Blackberry Security Summit 2021
10/13/2021 11:00 am EST	Veriato - Implementing An Insider Threat Mitigation Framework - Critical Elements For Detecting & Mitigating Insider Threats
10/19/2021 10:00 am PST	Gigamon/Ordr - Lunch & Learn: Exposing Ransomware-as-a-Service
10/20/2021 3:00 pm EST	DevOps.com - How to Scale Governance, Compliance and Security through GitHub Actions
10/21/2021	SecurityMetrics Summit 2021
10/26/2021 - 10/27/2021	Cybersecurity Symposium for Smart Cities 2021
11/4/2021	Tessian - Human Layer Security Summit

Latest Tech News

Fortanix and Google Partner to Deliver Google Workspace Client-side Encryption (CSE)	The partnership enables Google Workspace users to retain sole authority and control over the cryptographic keys for encrypting data and documents on Google Workspace with enhanced key management capabilities offered by Fortanix.
NowSecure Announces the World's First Dynamic Software Bill of Materials (SBOM) for Mobile Apps	"SBOMs are foundational items that should be generated for EVERY new version of a mobile app so that everyone knows what is in the software that they are using, and so that the enterprise can protect itself from critical supply-chain risks."
Cohesity Unveils First Data Protection Solution Integrated With Cisco SecureX	This first-of-its-kind integrated data protection solution with Cisco SecureX, based on Cohesity DataProtect, automates the delivery of critical security information to organizations facing ransomware threats, helping to accelerate time to discovery, investigation, and remediation
VMware ESXi Servers Encrypted by Lightning-Fast Python Script	Sophos said on Tuesday that the ransomware is being used to compromise and encrypt VMs hosted on an ESXi hypervisor in operations that, soup-to-nuts, are taking less than three hours to complete from initial breach to encryption.
Twitch Gets Gutted: All Source Code Leaked	An attacker claims to have ransacked Twitch for everything it's got, including all of its source code and user-payout information.
Citrix Checks ZTNA Into SASE Strategy	The service, dubbed Citrix Secure Private Access, is the latest in the vendor's arsenal of secure access service edge (SASE) software. The platform is designed to protect access to applications and services regardless of whether the end user is working in the branch, remotely, or from a managed or unmanaged device.
Box adds advanced ransomware protection and a ton of collaborative features at BoxWorks 2021	Box Shield's new malware deep scan capability is different, pairing deep learning with traditional hash-based or file-fingerprinting techniques that leverage existing data on malware.

Analysis, Reports, Trends

AiThority - Hornetsecurity Releases Results of Global Study on Ransomware Attacks	Although almost all respondents (86.9%) indicated that their senior leadership team is aware of ransomware risks, nearly half reported that preparation and prevention measures are delegated to the company's IT department
VentureBeat - Security.org: 68% of Americans use the same password across accounts	Notably, 85% are now employing two-factor authentication, adding a layer of online security to their passwords. In addition, the use of password generators nearly doubled year-over-year, from 15% to 27%, and password management services or browser vaults increased by 10%.
ZDNet - Russia poses the biggest nation-state cyber threat, says Microsoft	"Russian nation-state actors are increasingly targeting government agencies for intelligence gathering, which jumped from 3% of their targets a year ago to 53% -- largely agencies involved in foreign policy, national security or defense," he explained.
Threatpost - 4 Key Questions for Zero-Trust Success	As companies seek to implement a zero-trust network access (ZTNA) solution, there are important considerations that need to be made to avoid common pitfalls, in areas such as performance, data loss protection (DLP), advanced threat protection (ATP), visibility and reporting
WindowsReport - Security baseline for Windows 11 was just released by Microsoft	You will most likely want to download all the essential data from the Microsoft Security Compliance Toolkit, and you can easily find all you need on Microsoft's dedicated page.
VentureBeat - Zero trust and UES lead Gartner's 2021 Hype Cycle for Endpoint Security	The top five segments with the highest growth rates are application security testing, access management, endpoint protection platform (enterprise), secure email gateways, and identity governance and administration.
SiliconANGLE - IT and security professionals find patching complex, cumbersome and time-consuming	That shift, with employees connecting with various devices to access corporate networks, data and services as they work and collaborate from new and different locations, is said to have made patching harder than ever.

IBM - Take the cyber resiliency assessment
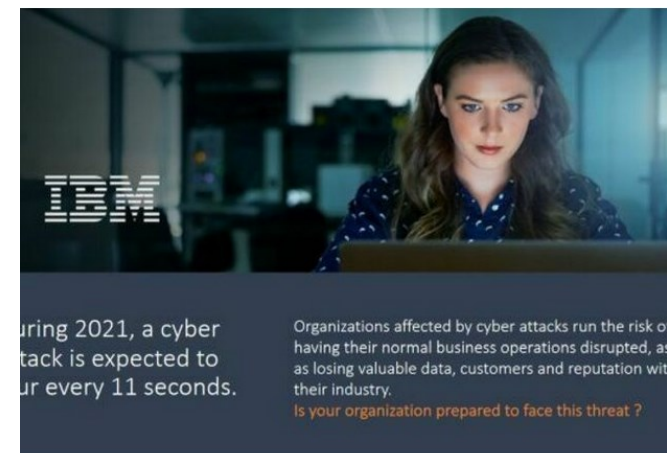

Funded by IBM (no cost to the customer)
• Two-hour virtual assessment workshop
• Only 2 weeks to receive the following deliverables from IBM:
- Detailed assessment report
- Management presentation
- Roadmap of recommended improvements and considerations
