

IDENTITY  
AUTOMATION

# RapidIdentity OnPrem vs Cloud

---

Architecture

# Agenda

---

- 01 Types of RapidIdentity Implementations
- 02 Database Configuration
- 03 Attributes and Schema
- 04 Cloud Only Features

# 01 - Types of RapidIdentity Implementations

---

- On-Premise
  - One or Multiple Appliances
  - Hosted by Customer
- RI Cloud
  - Containerized Tenant
  - Hosted by Identity Automation on AWS
  - Identity Bridge used to access Customer On-Premise systems

# 02 - Database Configuration

---

- On-Premise
  - Uses Customer Active Directory for Database
  - Changes in RapidIdentity are changes in Active Directory
- RI Cloud
  - RapidIdentity has its own database
  - Active Directory must have changes synchronized like Google or O365

# 03 - Attributes and Schema

---

- On-Premise
  - Unique custom attributes configured for each customer
- RI Cloud
  - Common attributes for all customers
  - Standard Schema

# 04 - Cloud Only Features

---

- Insights
- Studio
- SSO Portal
- RapidIdentity GO! Mobile App
