## Introducing Timesheets

### New Time Management Solutions in Steelhead

The new Timesheets feature offers a way to clock in and sort time off both to a high degree of precision, and they include plenty of extra features as well, including:

- **Robust Time Tracking:** Clock work hours and time off precisely
- **Easy Sorting:** Time off Sets and Types allow for better organization
- **Overtime-Friendly:** Bonus hours can be calculated right away

Enjoy less time adjusting with Timesheets now available in Steelhead's plant operating platform.

## Shop Spotlight

### Digital NADCAP Shop - Veterans Metal

Did you have a chance to read the December issue of Products Finishing Magazine? If not, you may have missed learning about Veterans Metal's story becoming the first ever digital NADCAP surface finishing job shop!

## READ THE ISSUE

*"The process that we captured from the last time we worked on the part is already in the software. I used to type the same information three times. And then I had to use a pen and paper to write things down. The worst thing about pen and paper is that people can write whatever they want. But now, with the shop's use of iPads and QR codes, part tracking is much more accurate and avoids human error."*

*- Andrew Kossowski, Owner*
