

Coming Soon: Updates to Quoting in Steelhead

In a few weeks, Steelhead will be releasing an update to Quoting. This update will grant the user more quoting flexibility and specificity, with one Line or Line Item allowing association to multiple Parts and vice versa, similar to the way Sales Orders are structured.

This will also streamline the process of creating a Sales Order directly from a Quote, easily mapping each component of a Quote to a corresponding component in the Sales Order.

We will be sharing more information about this update as it becomes available.

These updates are designed to help you run your shop more efficiently. As always, please reach out to us at support@gosteelhead.com with any questions!

How Steelhead Accounting Will Save You Time

Gain Efficiency and Insights Like Never Before!

Steelhead now has an accounting feature that directly connects all parts of your shop to your financials, eliminating the need for siloed systems and saving you from having to manually enter or calculate numbers.

- **Increase Efficiency:** No more double checking to see if your numbers match across different softwares—you'll have a single source of truth.
- **Improve Accuracy:** Up-to-date cash flow, sales revenue, and outstanding billing are all at the tip of your fingers.
- **Expand Visibility:** A payment you see in Accounting can be followed back to the Invoice, Sales Order, Quote, and everything in between—then is also visible in your margins and job costing.

If you'd like to learn more about getting started with Steelhead Accounting, reach out to us at support@gosteelhead.com.
