## Streamline Your Outsourcing Process

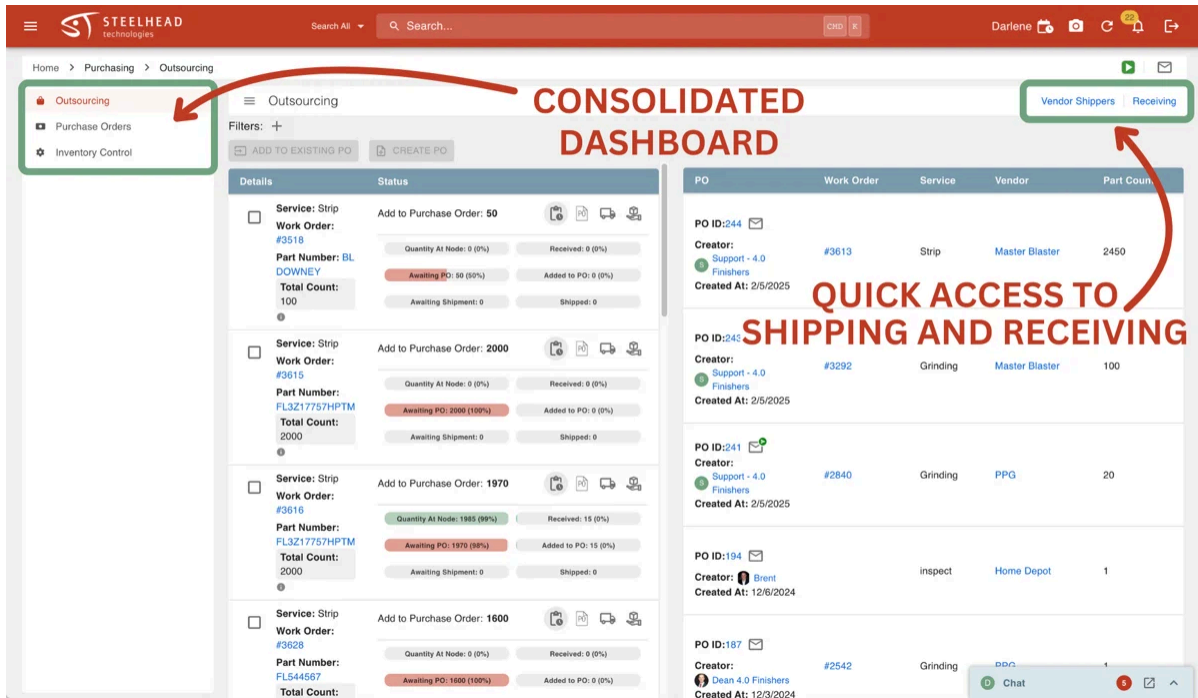

Prepare for a significant change. In a few weeks, Steelhead will release an update aimed at improving your user experience with a more user-friendly interface.

This update is designed to simplify your workflow and boost productivity when it comes to Outsourcing, Shipping and Receiving, and will benefit you in many ways.

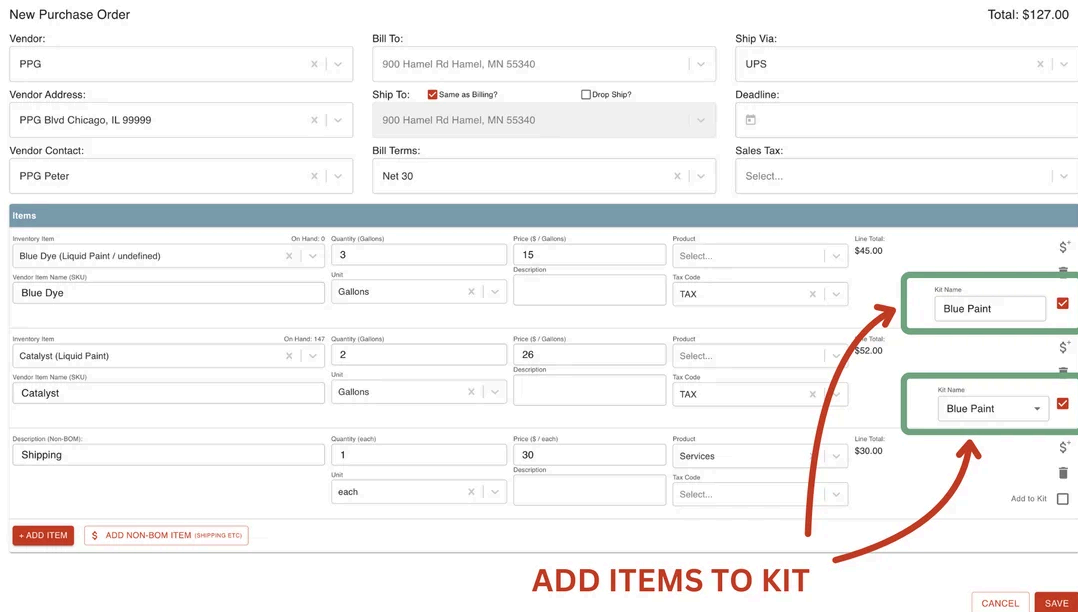

- Improved functionality with being able to receive multiple items at once
- Purchase Order flexibility to model complex Pricing, Accounting and Inventory combinations

Seamlessly integrated Outsourcing, Purchase Orders and Inventory Control will make it faster and easier to do everything from one dashboard.

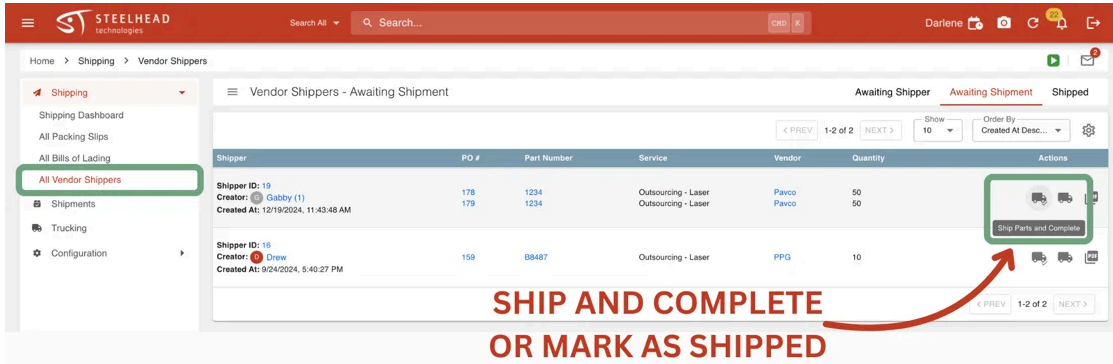

- Quick overview of status, progress and orders created for Outsourcing
- Purchase Orders have the added ability to create Lines and Line Items, similar to Sales Orders for more specificity
- Create customizable Kits so that one Purchase Order line can be associated to multiple inventory items

Enhanced Shipping Process:

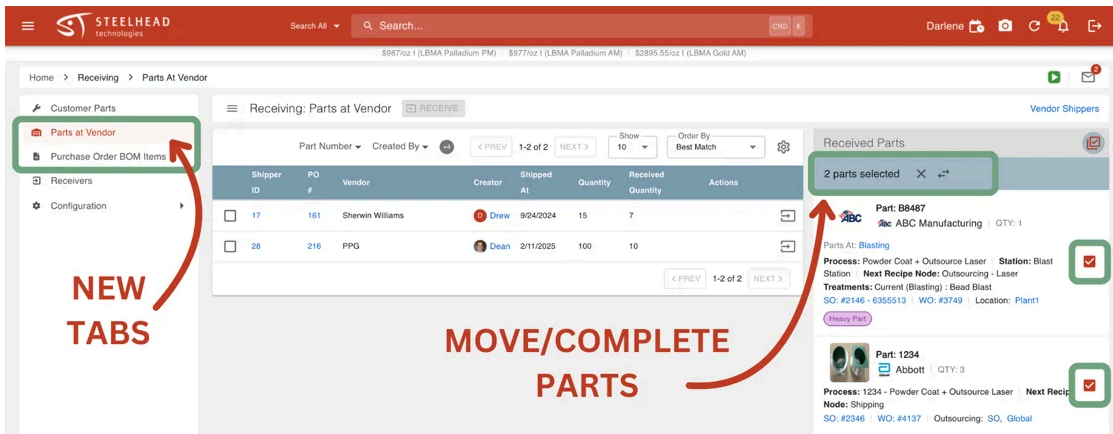

- Access Vendor Shippers directly within the Shipping dashboard for streamlined shipping management

- Utilize the new "Ship and Complete" option when Outsourcing is the last step on your Work Order, completing your parts without having to Receive them

In an effort to incorporate your feedback, Customer Parts and Purchase Order BOM Items have been separated into their own tabs to help your team stay focused on their specific tasks. Improved Receiving abilities include:

- Easily access Parts at Vendor and Purchase Order BOM items from new tabs on the side menu within the Receiving dashboard
- Move parts or mark as Complete from Receiving

- Save valuable time by receiving and moving multiple items simultaneously

Receive Purchase Order

Vendor: PPG

Purchase Order: Search By PO#

**SELECT MULTIPLE ITEMS TO RECEIVE**

Available Purchase Orders: RECEIVE SELECTED ITEMS (0)
