

Reminder: Optimized Outsourcing

Enhanced Outsourcing, Purchasing, Shipping and Receiving!

With Steelhead's commitment to your success and continued effort to incorporate your valuable feedback, we will soon be releasing an update creating a more robust Outsourcing process. This update is designed to boost your efficiency and simplify your workflow.

Benefits to You:

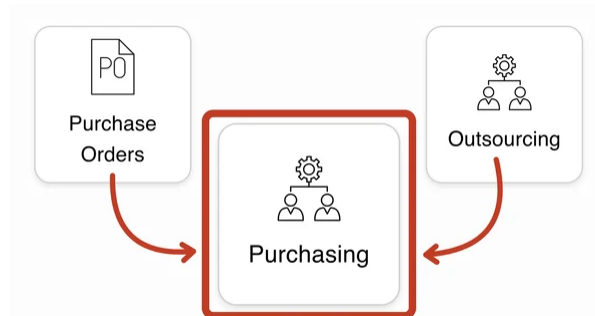

- Increased productivity through unified dashboards
- Enhanced flexibility in managing complex orders
- Streamlined shipping management
- Time-saving features in Receiving and processing items

[See video overview here:](#)

Key Improvements:

- **Outsourcing:** Quick overview of status, progress, and orders, plus seamless integration with Purchase Orders and Inventory Control
- **Purchase Orders:** Flexibility to model complex Pricing, Accounting and Inventory combinations with Lines/Line Items and ability to create Kits
- **Shipping:** Direct access to Vendor Shippers within the Shipping dashboard along with a new "Ship and Complete" option when Outsourcing is the final step on the Work Order
- **Receiving:** Easily receive multiple items simultaneously, new tabs for Customer Parts and Purchase Order BOM Items, and Move Parts or mark as Complete directly from Receiving

This update was designed to drive efficiency throughout all of your workflows. With Steelhead, you're not just managing operations, you're mastering them.

We're committed to your success. Please email us at support@gosteelhead.com with any questions!
