

We wish to extend our appreciation to all Steelhead users for supporting any modifications made to your processes with the latest update. These changes will prove advantageous for each and every shop!

---

## The Sales Order update is live!

You now have access to the following:

- The ability to create Sales Orders with Sales Order Line Items, without Work Orders
- The ability to associate parts with Sales Order Line Items after Sales Order creation
- The ability to edit and rearrange Sales Orders, and associating previously entered line items with parts
- Direct relationship between Sales Order Line Items and Invoice Line Items

*Please contact [support@gosteelhead.com](mailto:support@gosteelhead.com) if you have any questions pertaining to the new Sales Order workflow!*

---

## Highlighted Updates

### Work Orders

- Ability to switch between active and completed Work Orders in Customer Portals
- Filter Work Order table by Order Type
- "View All Invoices" button now available on the Invoice Report in Insights to reach all invoices quickly
- Part Number PDFs

### Customer Profiles

- Added a file upload menu onto customer profile pages
  - Intended for easily storing of associating a file with any given customer
  - Includes size preset options for any images attached
- When there is a power tools error when creating an invoice, an error message now tells the user to contact support

# SHOP SPOTLIGHT

## POWDER COATING TECHNOLOGIES

[Powder Coating Technologies](#), a 30+ year powder coating industry leader in Plymouth, MN embraced the Starter Package as a tool to raise the bar on efficiency, quality, and customer communication.

Steelhead's **Starter Package** was designed to offer **custom job shop software**, **deployed lightning-fast**, at the **lowest cost possible**. The Starter Package includes essential elements to turn a job shop into a profit-generating powerhouse through digital systems and automation in record time.

As a former Director of Operations at Amazon, Chad understood the importance of integrated technology to optimize warehouse operations. He knew exactly what he wanted and began researching options. He sought:

- Enhanced employee experience by removing barriers and simplifying workflow
- Virtual order tracking to eliminate bottlenecks, improve flow, and reduce lead times for customers

- Paper elimination in favor of cloud-based solutions to simplify information/communication flow
- Data-driven decisions to identify trends, root cause defects, and act
- To enable scale by reducing non-value-added tasks and firefighting with more time to think big

They quickly found Steelhead Technologies and moved efficiently through the demo and agreement process. Within three weeks from the first contact, Powder Coating Technologies was fully transitioned from implementation to the Customer Success team, showcasing the agility of the Starter Package.

Powder Coating Technologies' success with Steelhead's Starter Package showcases the effectiveness of a budget-friendly, rapid deployment solution. The transition from manual processes to a streamlined digital system has not only improved efficiency but has also set the stage for continuous improvement and future growth. The team effort in creating the intuitive and industry-changing solution is paving the way for many other organizations to follow.
