## Major Update to Specs in Steelhead

Specs will be undergoing a major update in the next few days. This update will tie specs more deeply to work order recipes, which will enable more complex and flexible behavior.

The screenshot shows the Steelhead Technologies software interface. At the top, there is a navigation bar with the company logo, a search bar, and user information (Marc - Testing). Below the navigation bar, the main content area displays details for a work order. The 'Part Number' is 'Ladder', and the 'Current Node' is 'Receiving'. The 'Part Number Description' is 'Ladder PN Description: 6FT'. The 'Nominal Units' are '50 FT (5.000 FT/part)', and the 'Parts Per Rack' is '2 Parts Per Small'. Below this, there is a 'Spec Field' section with 'mils - spec1' selected, and a 'MEASURE NEEDED TO MOVE (3)' button. A red circle highlights the 'EDIT SPECS' button. Below the spec field, there is an 'INVENTORY' section with 'CONFIGURE' and 'SCAN BATCH' buttons. The inventory table has the following data:

Item	Treatment(s)	Total Remaining Qty	Depleted Qty (WO#2735)	Cost (\$)	Active Batch	Actions
Aqua Green	Happy Yellow	15 (LBS)	0 (LBS)	\$0.00	50309 (LOT#: 34) Calumet Container: Box 2 Calumet	DEplete ✓ USED
Happy Yellow	Happy Yellow	0 (Gal)	0 (Gal)	\$0.00	None	DEplete ✓ USED

Below the inventory table, there is a 'Work Order Comments' section.

*Specs must be edited from the Work Order page for existing work orders. Click the image above for a video demonstration.*

With this change, updating specs on a part number or treatment will only apply to future Work Orders.

- If a part number is already on an existing work order and the spec needs to be adjusted, this must be done on the work order.

- We recommend using the "Edit Specs" button on the work order.
- Alternatively, you can also use the Contract Review functionality.
  - Parts at a "contract review" node will appear in the "Contract Review" tile, where you can easily add or archive specs, spec fields, or edit/add/archive spec field parameters
  - Users must have "Read: Contract Review" permissions to access Contract Review.
- Editing specs from the Work Order edit specs dialog or on Contract Review requires the "Archive: Spec Measurements" permission for the user making the adjustments.

If you have any questions about this new update, please contact [support@gosteelhead.com](mailto:support@gosteelhead.com). Thank you!
