

## BI-WEEKLY PRODUCT UPDATES

---

### Prioritize Your Work Using Station Prioritization

#### **Create station-specific priority lists to organize your jobs!**

Prioritize your work station-by-station with the new station prioritization update. A new "Station" field is found in your Prioritization dashboard in Steelhead (circled in red in the image below). When you select the desired station, the priority list will change to display the station name and its own priorities.

- The station priority list is completely independent from the global priority list featured below.
- Station priorities override global priorities.
- Station Priority is only offered in the Steelhead Power Package and above.

## Steelhead University "Operator Training" is ready to use

Ensure your *whole* team knows how to use Steelhead effectively!

Give your operators all the tools to succeed when using Steelhead on the production floor. Enroll your new workers into "Operator Training" to introduce the software, and enroll your existing workers to make sure they use all the features correctly and efficiently. The "Operator Training" course provides its users:

- An overview of the general functions of Steelhead.
- An abundance of helpful videos and examples.
- Straightforward directions about operator-specific duties.

To enroll yourself or your team in Steelhead University, email [learn@gosteelhead.com](mailto:learn@gosteelhead.com).

---

## Product Update Highlights

### **Multiple files can be uploaded at once to documents**

Upload multiple files to Steelhead Quotes, Sales Orders, Work Orders, Part Numbers, Inventory Items, and directly to to Uploaded Files.

### **Define time-specific pay periods in Timesheets**

Built specifically for workers clocking in at 11 p.m. on Sunday, those late hours can be billed to the next pay period instead.

### **Toggle between active and inactive Work Orders**

A new button has been added to Sales Order pages to toggle between viewing active and inactive Work Orders.

### **New Purchase Order labels**

The Purchase Order labels have been updated to be more precise including labels such as "Active", "Fulfilled On Time", etc.
