## Reminder: Email Enhancements Just Released

Over the weekend, Steelhead released an update to email. The update will grant the user improved customization and tracking when sending emails from Steelhead.

You will be able to:

- Write your own email Subject line and Body text
- Add or remove your logo and preview before sending
- See a list of Email History including Sent and Received emails

[Click the video](#) for a walkthrough of all the email updates:

Please email us at [support@gosteelhead.com](mailto:support@gosteelhead.com) with any questions!

## Coming Soon: Updates to Customer Portal

Steelhead will soon be releasing an update that enhances the Customer Portal experience. With this update, you will gain:

- Customizable Primary and Secondary colors

- Ability to publish a notification that will be posted for every customer to see within their Customer Portal
- Improved security and a clean, updated UI

We will be releasing more information as it becomes available.

---

## Product Update Highlights

### Multi Part/Single Process

Added the ability to set a default Process/Treatment and create many Part Numbers with that Process/Treatment at once.

### Quality Hold in Watch Tower

Users will now see an alert tag on Parts within the Watch Tower when Parts are on Quality Hold.

## VIEW ALL PRODUCT UPDATES

These updates are designed to help you save time and have your shop running more efficiently.

Please email us at [support@gosteelhead.com](mailto:support@gosteelhead.com) with any questions!
