## Product Update: Shipping Dashboard "Truck Mode"

**Truck Mode gives delivery drivers exactly what they need - and no more!**

More often than not, the person who is picking up orders and signing packing slips does not need to create packing slips or bills of lading. Truck Mode helps make the shipping process even easier by only displaying the necessary info - packing slips and bills of lading waiting to be signed, and those that have been signed.

Home > Shipping > Truck Mode

**Shipping Dashboard - Truck Mode**

Filters: Customer: John Doe Fabricating

Packing Slips

Packing Slip Finalized

Packing Slip Signed

Slip ID	Date/Time	Customer	Weight	Orders
#614	3/16/23, 8:44 AM	John Doe Fabricating	Gross Wt: NaN (lbs)	Includes Orders: RO #1238 WO #2356
#612	3/16/23, 8:40 AM	John Doe Fabricating	Gross Wt: NaN (lbs)	Includes Orders: RO #1238 WO #2356

No shipped and un-signed packing slips in active work orders...

*If delivery drivers are using the same device to sign packing slips or bills of lading when they pick up orders, save the view filters. The shipping dashboard will show the same view with the same filters every time!*

In Truck Mode, the "create" options for packing slips and bills of lading are hidden. Use filters to further restrict what's visible - you can currently filter by Customer, Order, Location, and more. Take a look at the [Truck Mode](#) page and other [Shipping Dashboard](#) documents for more information!

## VOID AND ARCHIVE OLD INVOICES

Invoices may now be voided after they have left the "Last 30 Days" tile on the Invoicing home page. See ["Voiding and Adjusting Invoices"](#) for details!

## CREATE CERTIFICATES FROM THE SHIPPING DASHBOARD

You can now create multiple certs directly from the shipping dashboard page. See [Creating Custom Certs](#) for more info!

**This is not a full list of product updates.**
