Receiving Dashboard

Send parts to adjusted or new work orders, with new recipes, directly from the Received Order page!

With this powerful new feature, you can rapidly and easily add or remove nodes from existing recipes, create recipes from other processes, or create rework work orders from the Quality Management dashboard with just a few clicks.

The screenshot shows the Steelhead Technologies web application interface. At the top, there is a navigation bar with the Steelhead Technologies logo, a search bar, and user information for Jeff Halonen. The main content area displays a 'Work Order' for number 2829. The work order details include: Received Order #1652, Customer John Doe Fabricating, Deadline 7/24/2023 (in 6d 19h 18m), and Price \$1.10. There are buttons for 'SHOW DETAILS', 'SPEC RESULTS', and 'CREATE CERT'. On the right side, there is a vertical menu with links for QR Code Settings, Station Routing, Vendor Shippers, Certifications, Comments, Audit Log, Quality Holds, NCRs, and CARs. Below the work order details, there is a 'PARTS' section with a '+ ADD NEW PARTS' button and a filter dropdown set to 'Select...'. A table shows 1 JDF 1 Part at Shipped, with buttons for 'MOVE PARTS', 'HIDE DETAILS', 'QR CODE', and 'SPEC RESULTS'. At the bottom, there is a 'PART NUMBERS' section.

When parts are put on a quality hold for rework, create a new rework work order directly from the "remove quality hold" dialog on the QMS dashboard!

These new capabilities will be available for use by Friday, July 21st. Email support@gosteelhead.com or call/text us at 906-256-3259 for more info!

News

Steelhead Technologies recognized as a top MRP!

We are delighted to announce that Steelhead Technologies has been recognized as one of the top five American Manufacturing Resource Planning (MRP) products that are revolutionizing business operations. This prestigious recognition reflects our commitment to delivering cutting-edge solutions and driving innovation in the manufacturing industry.

We are proud to be at the forefront of this revolution, helping our clients optimize their operations and achieve their business goals.

Articles

This week's articles highlight the most common misconception when it comes to plant operations on paper - the fact that paper management is actually the most expensive way to run your operations. You'll also catch up on the recent announcement of Steelhead's Certification Scanner for NADCAP digitization!

Show Your Pride in Operational Excellence

New "Powered by Steelhead" badges available

We understand that you take immense pride in the services you provide to your customers. You can now demonstrate your commitment to delivering exceptional results by investing in the latest technology and operating systems that set the industry standard for operational excellence.

By prominently displaying these badges on your website (linking to gosteelhead.com optional), marketing collateral, and other customer-facing materials, **you will be able to communicate to your clients that you have embraced advanced technology and best practices, ensuring superior quality and customer satisfaction.**

The integration of Steelhead's plant operating system will further strengthen your competitive edge and elevate your reputation in the metal finishing industry. Your dedication to excellence will be acknowledged and recognized by customers and peers alike.
