First Look: Audit Logs

See complete activity history on Work Orders and Invoices from one page!

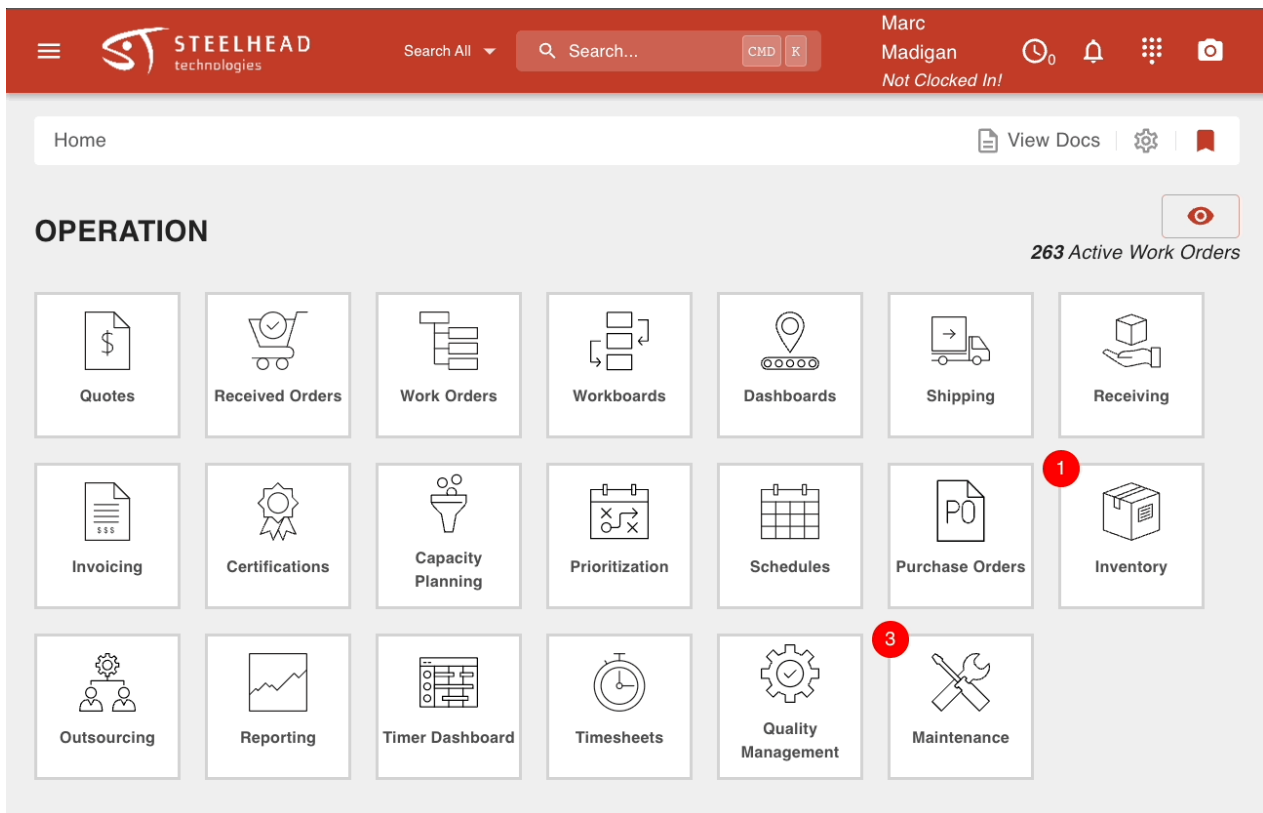

We are excited to announce the new Audit Log feature in Steelhead. By popular demand, complete history on Work Orders and Invoices can now be viewed by clicking on the "Audit Log" link.

The screenshot shows the Steelhead Technologies user interface. At the top, there is a navigation bar with the Steelhead Technologies logo, a search bar, and user information for Marc Madigan. The main content area displays a Work Order for number 2871, with details such as Received Order #1689, Customer John Doe Fabricating, and a deadline of 8/3/2023. A sidebar on the right contains a list of links: QR Code Settings, Station Routing, Vendor Shippers, Certifications, Comments, Audit Log, Quality Holds, NCRs, and CARs. The Audit Log link is highlighted. Below the work order details, there are buttons for 'SHOW DETAILS', 'SPEC RESULTS', and 'CREATE CERT'. At the bottom of the page, the text 'NO PARTS PRESENT' is visible.

Audit Logs provide a complete history of all actions taken on a Work Order or Invoice.

In the coming months, we will expand to offer audit histories on other pages as well. If there are more pages where you'd like to be able to see Audit Log information, please complete an [Enhancement Request](#) to help us decide where to build next!

The Enhancement Request form is available from the home page of the Steelhead app.

For more info, check out our [User Documentation](#), email us at support@gosteelhead.com, or call/text our Customer Success team at 906-256-3259!

Articles

This week's articles highlight the power of visual aids when processing orders, understanding information, and learning new technology.
