October Masterclass Coming Up

Learn the Ins and Outs of Invoicing in Steelhead!

We will be teaching our next monthly live Masterclass on Wednesday, October 23rd.

In this webinar, we will go over:

- The "Cannot Invoice Parts" tab on the Invoices page
- "Status" and Status explanations
- "Parts Associating" and "Parts Done Invoicing" checkboxes
- How Sales Order Lines directly correlate with Invoicing

The banner features the Steelhead Technologies logo in the top left. The main text reads "OCTOBER MASTERCLASS WEBINAR" in large white letters on a red background, followed by "INVOICING" in white letters on a blue background. Below this, it says "WEDNESDAY, OCTOBER 23RD" with a calendar icon and "12:00 CST" with a clock icon. The right side of the banner shows a person with long hair in a ponytail, wearing a maroon shirt, sitting at a desk with a computer monitor displaying a software interface.

Product Update Highlights

Support Percent-Based PTO Accrual

Allows Paid Time Off to be accrued by percentage, based on the hours an employee works per pay period.

Copy Spec Fields to Other Specs

Users can now copy default Spec parameters, along with Spec Fields, over to a new Spec.

View Spec Summary Info

Enabled users to see all information associated with an individual Spec on one easily accessible Summary page.

Step Multiple Work Orders at Once

Move Multiple improvements on Workboard Cards and step them all at once to the next step.

Improvements to Receiving Module

Users can now delete Batch Status Labels on the Label Configuration page. Labels stay on Parts after Batch is split. Images are displayed on Receiving list for Received Batches.
