How do you manage your inventory?

If, now and again, someone has to physically make the rounds to check on how much paint, powder, and tape is around at your plant, you might benefit from managing your inventory with Steelhead.

A screenshot of the Steelhead Technologies web application interface. The top navigation bar is red and contains the Steelhead logo, a search bar with "Search All" and "Sc CMD K" buttons, and the user name "Marc Madigan". Below the navigation bar, there is a breadcrumb trail "Home > Inventory Types" and a "View Docs" button. A yellow alert banner reads "Low Inventory Alert! 2 Items Are In Short Supply!". Below the alert, the section is titled "INVENTORY TYPES" with a "+ NEW INVENTORY TYPE" button and a "View Archived Types" link. A table displays the following inventory items:

Name	Remaining Amount	Remaining Value (\$)	Actions
Powder	2739.6 Pounds	\$25065.61666666667	[Edit] [Archive]
Tape	466.5 ft	\$11.751666666666665	[Edit] [Archive]
Grinding Wheels	54 Qty	\$48.5	[Edit] [Archive]
Blasting	140 lbs	\$28	[Edit] [Archive]
2 Liquid Paint	32 Gallons	\$570	[Edit] [Archive]

Our new customizable inventory alerts let you see where you're running low at a glance.

Inventory management in Steelhead is designed to make keeping accurate tabs on your supplies seamless. When your processes are set up, you can prompt operators to enter in amounts remaining (an easy weight measurement for powder) or amounts used (an easy estimate for items like tape) each time parts are moved from a station where inventory is consumed. By tracking inventory usage, you can see where money is being spent, track inventory levels in real-time, and ultimately [create more accurate job quotes](#).

To make managing inventory even easier and more customizable, we've added the ability to include custom inputs for your inventory items. Need to know where materials are stored? Want to keep a record of your vendor? You can create as many custom inputs as you want to track the information that you need at your facility.

The screenshot shows the Steelhead Technologies web interface. At the top, there is a navigation bar with the Steelhead Technologies logo, a search bar, and user information for Marc Madigan. Below the navigation bar, a breadcrumb trail reads: Home > Inventory Types > 38 > Items > 1686. The main content area is titled 'INVENTORY ITEM' and includes an 'EDIT ITEM' button. The item details are as follows:

Name:	Black Paint
Type:	Liquid Paint
Created:	5w 3d 11h 2m 52s ago
Creator:	Dean Halonen
Last Used:	2 (Gallons) - 9/9/2022 (2w 6d ago)
Remaining (Gallons):	19
Remaining Value (\$):	\$570.00
Alert Threshold (Gallons):	15
Archived:	<input type="checkbox"/>

On the right side, there is a 'Custom Inputs' section with a pencil icon. It contains three input fields: 'Bin Location', 'Owner Of', and 'Vendor'. A 'Submit' button is located at the bottom of this section.

Custom inputs give you the control to record the info you need to optimize your workflow and make smart decisions.

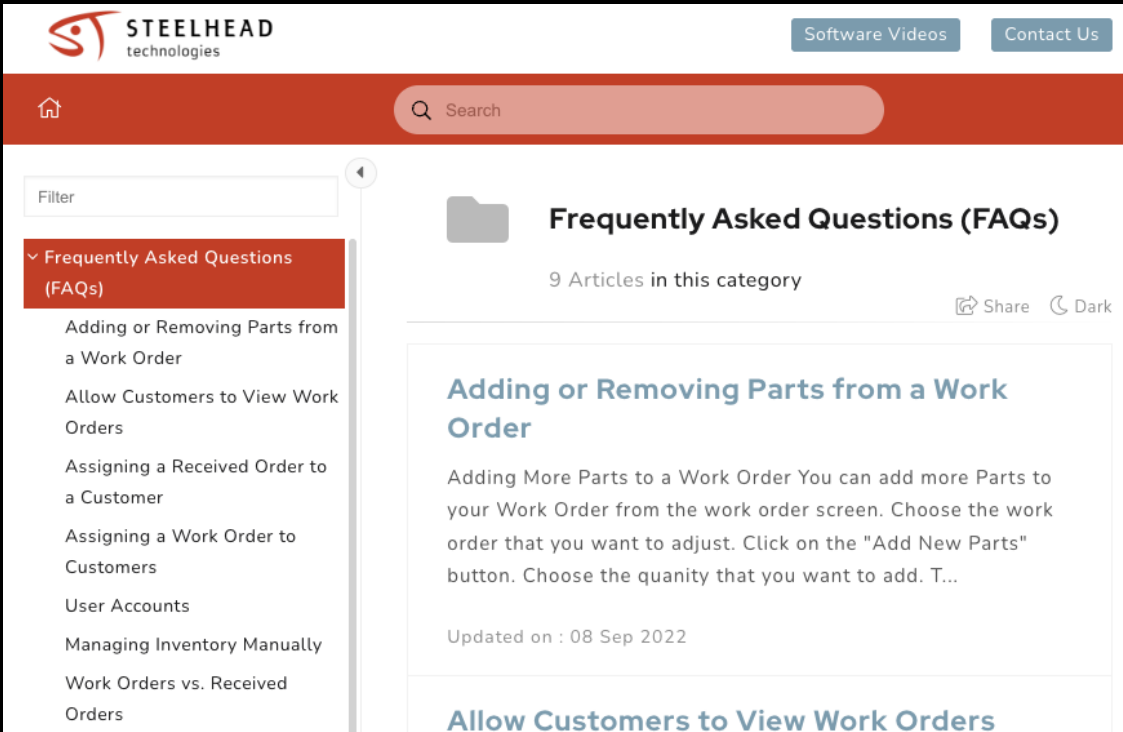

These new features and many others are designed to make the arduous task of inventory management a breeze. Take a look at some of our new docs for more information!

Have a question?

Here at the Steelhead team, we're big on making smart decisions. One critical piece of that is listening very carefully to the people that use our software. When you ask us questions, we also learn a little more about what we can be doing better.

The screenshot displays the Steelhead Technologies website interface. At the top left is the logo with the text "STEELHEAD technologies". To the right are buttons for "Software Videos" and "Contact Us". Below the logo is a navigation bar with a home icon and a search bar. A sidebar on the left contains a "Filter" box and a list of categories, with "Frequently Asked Questions (FAQs)" selected and highlighted in red. The main content area features a folder icon and the heading "Frequently Asked Questions (FAQs)", followed by "9 Articles in this category". There are "Share" and "Dark" mode icons. The first article is titled "Adding or Removing Parts from a Work Order" and includes a brief description and an update date of "08 Sep 2022". The second article is titled "Allow Customers to View Work Orders".

Our brand-new Customer Success portal includes guides on using Steelhead, a Glossary, and FAQs. When we see the same questions coming in from multiple users, we know that it's either something that should be included here or addressed on the technical side.

Don't hesitate to reach out! Contact us any time at support@gosteelhead.com - we're always happy to hear from you!
