

Custom Reports Module

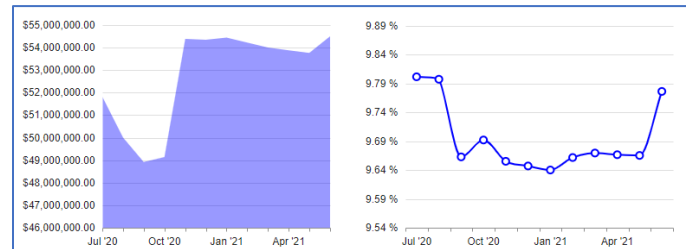

The Bryt System provides users with several standard reports for the most common reporting needs. If your company requires specific reports that are unique to your organization, Bryt can accommodate this using our **Custom Reports Module**.

The Custom Report Module allows access to a custom reports tab. This tab stores all the custom report templates that have been created for the customer.

To develop the reports, a Bryt client services representative will consult with the client to determine the reporting needs. Bryt technical staff will build the report template based on the clients' specifications. Upon completion, the report template will be placed on the client's custom report tab.

Bryt uses a sophisticated report writer to build custom reports. The report writer accommodates almost any type of report. Because Bryt technical personnel are skilled in the use of the report writer and have deep knowledge of the structure of the Bryt Software data, we can produce highly customized, professional reports much quicker than the reports could be produced outside of the Bryt system.

LoanName	BrytState	ClosingDate	PaidOffOn	LoanType	LoanAmount
InDefault			Count:2		
180301-MP	InDefault	3/7/2018		Refinance	200000.00
