

# Custom User Fields Module

The **Custom User Fields Module** allows Bryt users to supplement the standard data stored in the Bryt system by adding custom fields specific to a loan or a contact. **Custom User Fields** are data fields that are added to the Bryt system to collect and report on almost any type of data, including:

- Text (short text)
- Paragraph (long text)
- Integer
- Decimal
- Currency
- Date
- Percentage
- Yes/No/None
- Multiple Choice

**Custom User Fields** are attached to your loans and/or your contacts and can be included in your reporting.
