

#### QUICK REFERENCE GUIDE

### REPCO NAVIGATOR PRO INTEGRATION

#### **MEGABUS HELPLINE**

FREE online Marlin courses: eLearning.megabus.com.au e-mail: support@megabus.com.au phone: (03) 9262 5000

#### Introduction

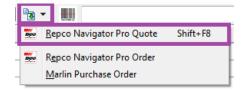

Parts and pricing information can be transferred directly from Repco Navigator Pro to a Marlin GTX work order or invoice, significantly reducing key strokes, data entry time and errors.

## **Create a quote using Repco Navigator Pro**

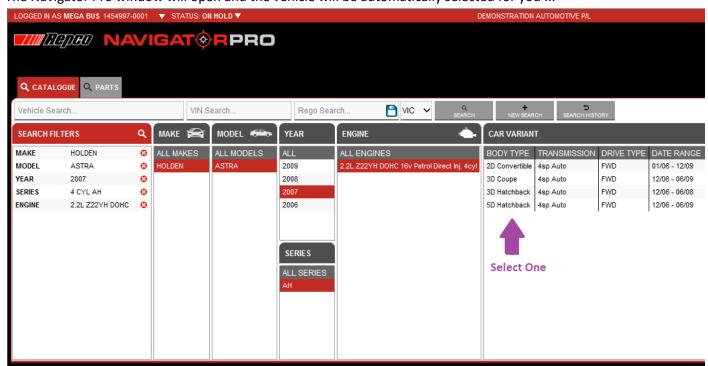

Complete the top section of the Work Order as normal.

Hint: enter as much info as possible on the Vehicle tab in Autotracker to assist Navigator Pro in auto selecting the correct vehicle and displaying appropriate parts.

Click on the Import External Data icon and select Repco Navigator Pro Quote (or just press Shift-F8).

The Navigator Pro window will open and the vehicle will be automatically selected for you ...

Select the Car Variant and the Categories screen will open and display suitable parts for the selected vehicle.

# Manually selecting parts

To manually select parts, click on the red arrow heads to select the required quantity and then click on ADD.

To select parts from other categories, select the category in the CATEGORIES panel at left.

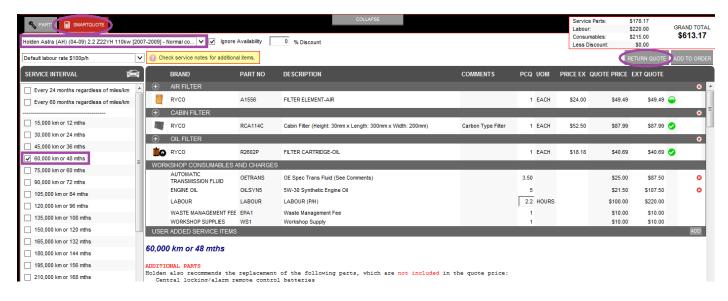

When you click on ADD beside the quantity, the item will be added to the Order Pad at right of screen and the cumulative total will be shown ...

Use the red arrow heads in the Order Pad to change quantities of the selected parts, or the red 'x' to remove a part.

When done, click on RETURN PARTS TO and the parts will automatically be included on the Marlin Work Order.

# **Log Book Servicing**

To automatically include all products required for a log book service, click on the SMARTQUOTE tab, select Normal

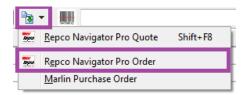

Conditions or Adverse Conditions in the dropdown box below the tabs, then select the Service Interval (e.g. "60,000 km or 48 mths").

The required parts and service items will be displayed. If there is more than one option for a particular part, click on the SELECT button beside the required one.

The totals will be displayed at the top. When done, click on the RETURN QUOTE button and the products and service information will automatically be included on the Marlin Work Order.

## **Insufficient Quantities**

If you have insufficient stock of any parts on the Work Order, click on the Import External Data icon and select Repco Navigator Pro Order (or just press Shift-F8) ...

Click on the 'x' to remove any items if necessary and then click on the SEND ORDER button to place the order.
