VERSION

8.10.1

ExactBid's Real Estate Information Management System (RIMS) Version 8.10.1 is a release for all RIMS 8 users.

These Release Notes provide a summary of bug fixes and performance improvements for the following noted areas:

NEW FEATURES & ENHANCEMENTS

Reports

Adhoc Report
RIMS User information added as a new view to provide an option to include user details in the Project, Job and Task views.

Lender Summary Report
Added "Award Date and Task Complete Date" filters to the report.

QUALITY IMPROVEMENTS

Reports

Adhoc Report
Improved report generation times for all reports that contain encrypted data such as borrower names and loan numbers.

Improved report generation times when running a report that includes information related to jobs/tasks placed on hold.

Data Summary Report
Improved report generation times when data range includes information related to jobs/tasks placed on hold.

All Current Assignments

New Requests
Job Manager filter is applied to New requests section. System counts only the new open tasks for the selected Job Manager/s.

User Export

Hierarchy code
Using advanced option to export users will display hierarchy code values appropriately.

Service Request

Service Types default task code
When submitting a service associated to multiple task codes, system will create the task with the default task code first.

USABILITY IMPROVEMENTS

Service Request

Service Request creation
Form fields and Service Type selection layout has been optimized for lower resolution screens.

User Management

User creation and updates
Confirmation message will appear when a user account is added or updated.
