VERSION

8.13.1

ExactBid's Real Estate Information Management System (RIMS) Version 8.13.1 is a release for all RIMS 8 users.

These Release Notes provide a summary of selected bug fixes and performance improvements for the following noted areas:

QUALITY & USABILITY IMPROVEMENTS

Service Request Form

Engineering (Construction) Service Request
For sites that require a Service Request Person (Account Officer, Requester, Loan Admin, Credit Admin) to be selected at the Services page, users would receive an error when attempting to send the Service Request. This has been fixed; users can now select the appropriate person type and send the Service.

Organization

Organization Settings
For sites with Organization enabled, a caching issue caused some users to see inconsistent Lending Groups from within their Organization. Additionally, for Job Managers with Organization enabled, they could potentially see Projects outside their Organization. This has been fixed; users now see only the Lending Groups within their Organization and Job Managers can only view Projects within their Organization.

Notifications

Documentation Complete Notice
For sites with the *Documentation Complete* Notice enabled, the link to the Job Attachment page would direct the user to the My Jobs page instead of the Job Attachment page of the Project. This has been fixed; users are now directed to the Job Attachment page of the Project.

Project Console Page

Add Comment Function within Job Comments
Job Managers and Content Administrators did not have the Add Comment function. This has been fixed; the option to add a comment in Job Comments has been restored.
