VERSION

8.15.1

ExactBid's Real Estate Information Management System (RIMS) Version 8.15.1 is a release for all RIMS 8 users.

These Release Notes provide a summary of selected bug fixes and performance improvements for the following noted areas:

QUALITY & USABILITY IMPROVEMENTS

Batch Invoice

Editing Invoices

Upon clicking the pencil icon next to an Approved invoice within the Batch Invoice tool, an error message stated "An error occurred while processing your request. Tracking Ticket: 582-3L30V3H3" and the invoice did not become editable. This has been fixed; clicking on the pencil icon now opens the invoice for editing.

Note: The Paid in Full checkbox has been removed from the Pay Invoice page as this is now handled automatically. Also, the Paid in Full column has also been removed from the Batch Invoice Approved page. When the sum of final invoices equals the amount of external fees on a Task with a Complete Date, the Task Status will transition from Unpaid to Closed.

Engagement Letter

Engagement Letter Preview

When an Engagement Letter included text with special characters pasted from another source, such as Microsoft Word, the Preview Engagement Letter feature did not work. The page would hang and no preview would be generated. This has been fixed.

Scope Item Order

In some cases, scope items appeared in a different order on the Engagement Letter than they did in the RFP Template. This issue was most pronounced in Engagement Letters with ten or more scope items. This has been fixed; the order of scope items defined in the RFP Template consistently defines the order in which those scope items appear in the Engagement Letter.
