

REPORT WRITER WEB 1.21.0 RELEASE NOTES

The following feature enhancements and bug fixes have been applied as a part of the Report Writer Web version 1.21.0 release.

NEW FEATURES AND ENHANCEMENTS

Report Writer **Login**

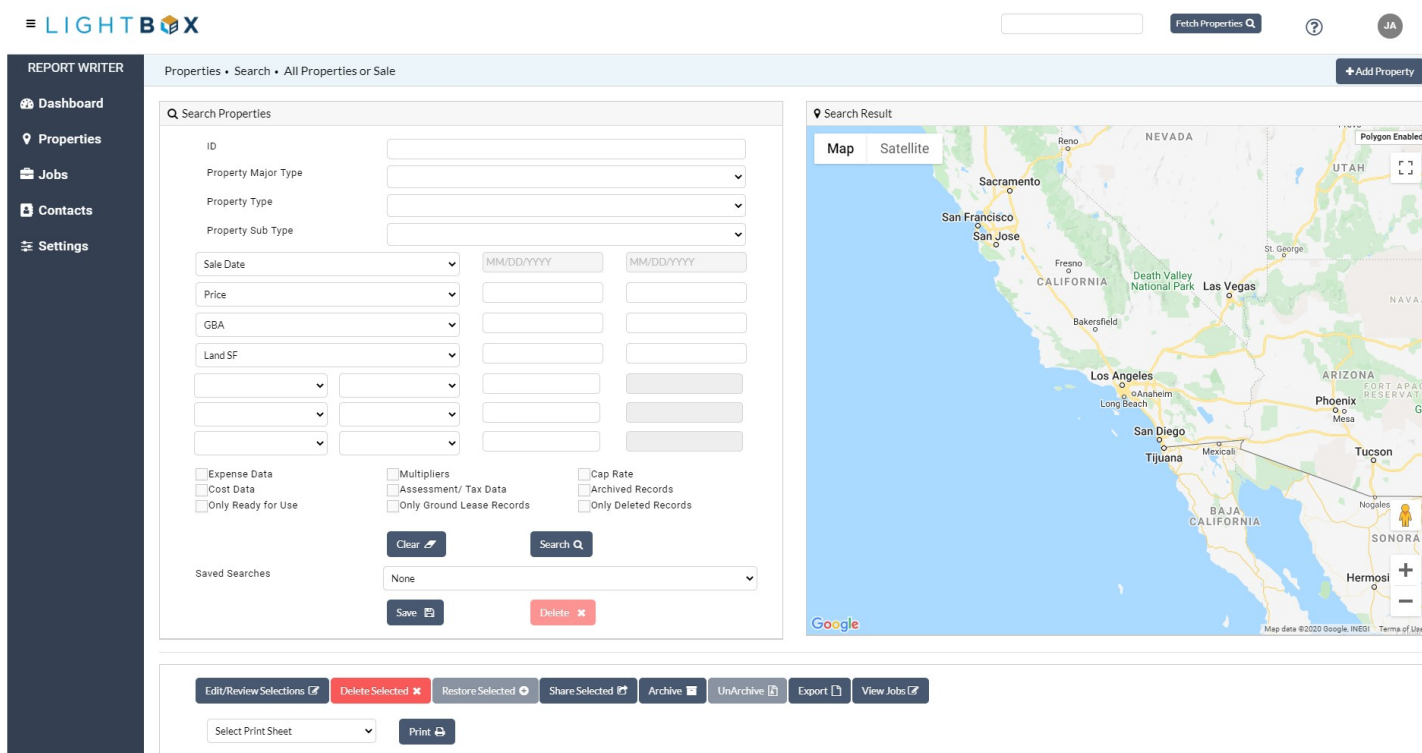

Something new is in the works. We've provided a single-sign on authentication to connect with other LightBox applications.

The screenshot displays two login options. The first is a standard 'Log On' form with fields for 'User Name' and 'Password', and a 'Log On' button. The second option is 'Log In With LIGHTBOX', which includes the LightBox logo and a link for 'What is LightBox?'.

For more information, please see our documentation.

Report Writer **User Interface**

We've changed our website colors as well as improved our Navigation to be consistent with our parent brand, LightBox. You can now hide the Navigation menu by clicking on the icon to the left of the LightBox logo.

Report Writer **Properties**

We've added an "Add Property" button to the blue sub-header of the Properties module. Now you can quickly create a property with ease!

Report Writer Jobs

We've added an "Add Client" button to the Job editor, removing the need to close out of a job to add a client.

BUG FIXES**Report Writer Custom Calculations**

We've corrected an issue where using a field twice in a custom calc will disallow UDF information from being saved for a property.
