

The following enhancements and/or bug fixes have been included in the *February 2026* release:

ENHANCEMENTS

PROPERTY CREATION & UPDATE METHODS NOW VISIBLE

To improve transparency and support audit workflows, the **Property page** now displays:

- **Property Creation Method**
- **Property Update Method**

Property · ID: 14337 · 123 Delancey St · Health Care

General Transactions Site Zoning Improvements Com Lease MF Lease Inc.|Exp. Assessment Cost Quick Sale

Created: 1/21/2026 5:50 PM by Lakshmi Penumarti via Valuation Subject Import | Last Modified: 2/12/2026 9:09 PM by Jessica Alford via Report Writer Web Interface

These fields provide clear visibility into how and when a property record was initially created and subsequently modified. This enhancement supports internal governance, improves data traceability, and helps users better understand the origin and maintenance history of property records.

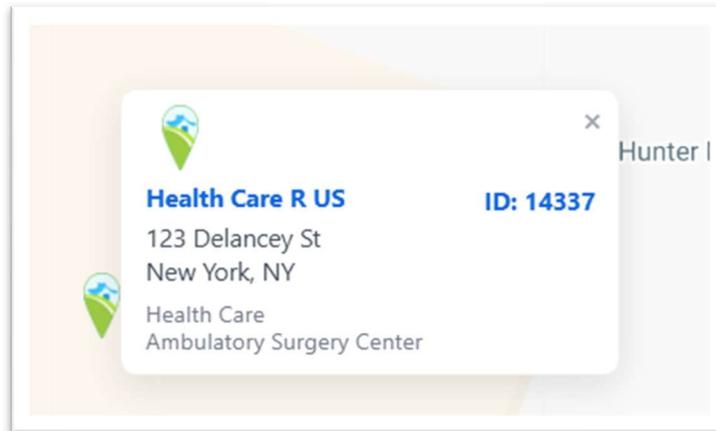

**Benefits:**

- Improved audit transparency
- Clearer data lineage and record history
- Greater confidence in property data integrity

## MODERNIZED PROPERTY MAP PIN TOOLTIP

We've refreshed the **property map pin tooltip** with a modernized design and improved usability.

### Enhancements include:

- Cleaner, more intuitive layout
- Improved readability of key property details
- Enhanced visual styling aligned with our current design standards

This update provides a smoother, more informative map interaction experience while maintaining quick access to essential property information.

## BUG FIXES

- **Save Changes Navigation Fix**  
Resolved an issue where the *Save Changes* confirmation modal did not consistently navigate users to the intended page after saving.
- **Numeric Value Character Limit Removed**  
Fixed an issue that incorrectly limited certain field values to 9 characters/figures. Fields now support the full expected value length.
- **Property Record Navigation Correction**  
Addressed an issue where interacting with multiple property records in succession could redirect users to an unintended property record.
- **Sub-Parcel Deletion Permission Update**  
Corrected an issue preventing non-admin users from accessing the *Delete Sub-Parcel* button when they had appropriate permissions.

## WHAT'S NEXT?

LightBox is working on some great new features to increase your efficiency.

- Enhanced Property Search – Modernized filter experience; expandable map, categorized fields
