Table of Contents

OVERVIEW

The Indicator Migration application performs a one-time sync of an Indicator from a remote ThreatConnect® instance to a local ThreatConnect instance. The sync overwrites the Threat Rating, Confidence Rating, Tags, and Attributes for the destination Indicator on the local Owner in the ThreatConnect instance.

DEPENDENCIES

ThreatConnect Dependencies

- Active ThreatConnect Application Programming Interface (API) Keys for source and target servers

NOTE: All ThreatConnect dependencies will be provided by default to subscribing ThreatConnect Cloud customers. Private Instance customers can enable these settings during configuration on the** Account Settings **screen within their Private Instance of ThreatConnect.

CONFIGURATION PARAMETERS

Parameter Definition

The parameters defined in Table 1 apply to the configuration parameters during the job-creation process.

Table 1

Name	Description
Local ThreatConnect API Access ID	This parameter is the API Access ID on the *local* ThreatConnect instance.
Local ThreatConnect API Secret Key	This parameter is the API Access secret key on the *local* ThreatConnect instance.
Destination Owner	This parameter is the Owner to which the Indicators will be written.

Remote ThreatConnect API Access ID	This parameter is the API Access ID on the *remote* ThreatConnect instance
Remote ThreatConnect API Secret Key	This parameter is the API Access secret key on the *remote* ThreatConnect instance.
Remote Owner	This parameter is the Owner of the Indicator to be migrated on the *remote* ThreatConnect instance.
Apply ThreatAssess Rating/Confidence from Remote Owner if Available	If this checkbox is selected, the ThreatAssess Threat Rating and Confidence Rating values will be copied to the local Indicator instead of the default Threat Rating and Confidence Rating values.
Proxy TC API Connection	This parameter indicates whether a proxy is required to access the local ThreatConnect instance. It is usually required when running on an Environment Server.
Proxy External API Connection	This parameter indicates whether a proxy is required to access the remote ThreatConnect instance.
Logging Level	This parameter is the logging level for the Job.

Organization Configuration

The target Organization must have the same Attributes as the source Organization; otherwise, Indicators using unavailable Attributes will fail to load into the target Organization.
