For CobbleStone Software version 22.6.1 Rev 260226, New Feature(s), Enhancement(s), and/or Resolution(s) were added to the following areas:

- Core System: Contract Insight
- Module: Document Collaboration & E-Signature
- Module: Vendor/Client Collaboration Gateway

Hotfix 22.6.1.260226 - Core System: Contract Insight

The Core System provides Contract Insight's core components and functionality for full lifecycle management of your organization's contracts and committals.

CORE SYSTEM RESOLUTIONS

RESOLUTION: Unable to Change Dock Title via Record Details Tab Setup

Reference #: 260226.337.26828

When configuring Record Details Tabs, titles of docks for an individual subtable or field group could no longer be changed and would default to the field group name from the Field Manager. Users with permission can once again set custom dock titles for individual field groups and subtables on Tab Details.

RESOLUTION: Translations Preventing Ability to Add a Vendor Inline When Adding a Contract

Reference #: 260226.1222.25741

The Add Inline option for the Vendor/Client field on a Contract Add screen was not available when an alternate system language translation was set. Users can now translate the page and still use the inline "Add Vendor/Client" option without interruptions.

Hotfix 22.6.1.260226 - Module: Document Collaboration & E-Signature

Optional Add-On Module for the collaboration of documents between internal and external users/participants. This module utilizes E-Approval (Electronic Approval) and/or E-Signature (Electronic Signature) processing to support full online negotiation via a secure online portal.

DOCUMENT COLLABORATION & E-SIGNATURE RESOLUTIONS

RESOLUTION: Mergeable Clause With Request Task Details Table Not Populating Values

Reference #: 260226.1157.22816

Some document templates that included Request Task Details failed to merge with an “Invalid Request ID” error. Templates using these fields inside a Mergeable Clause merged without error but did not populate the expected Task information. We updated the logic that validates Request Task Details within templates so merges complete successfully and pull the expected Task information.

RESOLUTION: Finalized Signatures Smaller

Reference #: 260226.345.25986

After clicking Accept and Finalize on a Signature Process, the signatures would appear much smaller than when originally placed - especially when multiple signing placeholders (not prefilled signatures) were used. Signatures now display at the proper size on finalized documents, regardless of how many signing placeholders are used.

RESOLUTION: Document Version State Not Updating As Expected

Reference #: 260226.1157.26003

When changing a document version from archived to published, the previously published attachment sometimes stayed published, resulting in two “published” versions (or two “archived” versions) at once. This occurred when using the Update button in the Manage Version Information. The Manage Version Information popup now updates version states correctly so only one attachment remains published at a time.

RESOLUTION: “Update fields” Crashes While Merging a Document

Reference #: 260226.1157.26421

Some templates - especially those with ~60-70+ mergeable clauses and Word cross-references (including broken “Error! Reference not found” items)—caused errors/crashes during the merge process. Templates with many mergeable clauses and Word cross-references now merge reliably; cross-references are updated as expected.

RESOLUTION: Merge External Template Option Generating Error

Reference #: 260226.1157.26704

The Merge External Template option generated an error when templates/mergeable clauses used linked-type fields; the rules engine produced incorrect filter expressions. Merging with external templates that use linked fields now works as expected.

Hotfix 22.6.1.260226 - Module: Vendor/Client Collaboration Gateway

Optional Add-On Module used to extend the functionality and collaboration scope of Contract Insight by providing a dedicated gateway portal for your vendors, suppliers, providers, clients, customers, respondents, etc. to view and interact with the contracts, solicitations, etc. you have with them.

VENDOR/CLIENT COLLABORATION GATEWAY RESOLUTIONS

RESOLUTION: Approval/Signature Processes Not Listed in Vendor/Client Gateway Portal

Reference #: 260226.1203.26287

Some Approval/Signature Processes were not appearing on the Vendor/Client Gateway for Vendor Contacts when accessing from the Approval/Signature Processes link under the VCG user menu. Approval/Signature Processes now appear correctly on the Vendor/Client Gateway for the designated contacts.
