Go to Themes>>Edit Code>>Snippets>>Subscription-cart-footer.liquid file and paste the code below between the existing functions (please ensure you do not overwrite or edit any other code in the script).

```
function getAwinAwc() {
   var sCookiesString = '';
   oRegEx = /_aw_m_\d+/;
   var aAwCookies = [];
   var aCookies = document.cookie.split(';');

   for (var i = 0; i < aCookies.length; i++) {
      var aParts = aCookies[i].split('=');
      if (oRegEx.test(aParts[0])) {
         aAwCookies.push(aParts[1]);
      }
   }

   if (aAwCookies.length > 0) {
      sCookiesString = aAwCookies.toString().replace(' ', '');
   }

   return sCookiesString;
}

function getAwinSnAwc() {
   var sCookiesString = '';
   oRegEx = /_aw_sn_\d+/;
   var aAwCookies = [];
   var aCookies = document.cookie.split(';');

   for (var i = 0; i < aCookies.length; i++) {
      var aParts = aCookies[i].split('=');
      if (oRegEx.test(aParts[0])) {
         aAwCookies.push(aParts[1]);
      }
   }

   if (aAwCookies.length > 0) {
      sCookiesString = aAwCookies.toString().replace(' ', '');
   }

   return sCookiesString;
}
```

In the same file, search for the function buildCheckoutUrl (options) and replace the existing function with the one below.

```
function buildCheckoutUrl(options) {
    // Build the Checkout URL
    var awc = getAwinAwc() || getAwinSnAwc();
    var checkout_url = 'https://' + options.checkout_domain + '/r/checkout?',
       url_params = [
          'myshopify_domain=' + options.permanent_domain, 'awc=' + awc
       ];
    url_params = url_params
       .concat(get_cart_token())
       .concat(get_ga_linker());
    return checkout_url + url_params.join('&');
}
```

Hit 'Save' and proceed to the final step below.

Go to the Recharge checkout 'thank you' box (within the Recharge app settings) and paste the code below inside the box (before saving changes, please replace all the XXXXX's with your own Advertiser ID).

```
<script>
var AWIN = {};
 AWIN.Tracking = {};
 AWIN.Tracking.Sale = {};
 AWIN.Tracking.Sale.amount = "{{ subtotal_price | money_without_currency }}".replace(/\,/,'.');
 AWIN.Tracking.Sale.currency = "{{ shop.currency }}";
 AWIN.Tracking.Sale.orderRef = "{{ order_number }}";
 AWIN.Tracking.Sale.parts = "DEFAULT:" + "{{ subtotal_price | money_without_currency }}".replace(/\,/,'.');
 AWIN.Tracking.Sale.test = 0;
 AWIN.Tracking.Sale.voucher = "{{ discount_code }}";
 AWIN.Tracking.Sale.channel = "aw";

var image = document.createElement("img");
 image.src = "https://www.awin1.com/sread.img?tt=ns&tv=2&merchant=XXXXX&amount=" + "{{ subtotal_price | money_without_currency }}".replace(/\,/,'.') + "&ch=aw&cr=" + "{{ shop.currency }}" + "&parts=" +AWIN.Tracking.Sale.parts + "&ref=" + "{{ order_number }}" +
"&vc=" + "{{ discount_code }}" + "&test=" + AWIN.Tracking.Sale.test;
document.getElementsByTagName("body")[0].appendChild(image);

if (document.getElementsByTagName("body")) {
  var sc = document.createElement("script");        sc.src = 'https://www.dwin1.com/XXXXX.js';
sc.setAttribute("defer", "defer");
 document.getElementsByTagName("body")[0].appendChild(sc);
 }
</script>
<script defer = "defer" src="https://www.dwin1.com/XXXXX.js" type="text/javascript"></script>
```

In the same section, once granted permission by Recharge, go to the "JavaScript on Page 1" code box and paste the below (replace the XXX's with your own Advertiser ID).

```
var sc = document.createElement("script");
sc.src = 'https://www.dwin1.com/XXXXX.js';
sc.setAttribute("defer", "defer");
document.head.appendChild(sc);
```

Save this last change and proceed to run a test transaction with the Awin test link below (replacing the XXX's again). Please inform your Awin technical contact once the transaction has been complete.
