

# For existing NordLayer members

<subject>

**Action required: Set up the NordLayer Browser**

<preview>

*Follow these steps to get started and share your feedback*

Hello <name>,

We're starting a limited rollout of a new business browser that's designed to keep your data secure and put everything you need to work in one place.

You've been selected to take part in the testing phase.

**Here's how to get started:**

1. Download the NordLayer Browser [here](#)
2. Open the app
3. Enter the org ID: [Insert your org ID]
4. Log in using [insert company-approved method (SSO, email, etc.)]
5. Start browsing

If you need help getting started, you'll find detailed instructions in [NordLayer Help Center](#).

This testing phase will help us decide if the browser is a good fit for <company name>, so your feedback is much appreciated.

Thanks!
